FAQ (10 articles)

SHIFT BILLING AND VALIDITY DATES

Source: <https://intercom.help/bsport-helpcenter/en/articles/5821982-prepare-temporary-closing-of-your-studio-holiday-mode>

When is the best time to prepare the temporary closure of your studio? When is the best time to prepare the temporary closure of your studio? The best time to prepare for the closing of your studio is as soon as possible. Except for pausing your subscriptions which would be best done the day before closing. In this article, you will see how :

SHIFT BILLING AND VALIDITY DATES

- Extend the validity dates of your passes Extend the validity dates of your passes
- Shift the billing date of your subscriptions Shift the billing date of your subscriptions

CANCEL SCHEDULED ACTIVITIES, WORKSHOPS AND APPOINTMENTS

- Cancel activities and workshops Cancel activities and workshops
- Cancel appointments Cancel appointments
- Removing availabilities Removing availabilities

SHIFT BILLING AND VALIDITY DATES

SHIFT BILLING AND VALIDITY DATES 1. Extend the validity dates of your passes 1. Extend the validity dates of your passes > Go to “Products” and then “Passes” > For each pass, choose “EXTEND THE VALIDITY FOR ALL MEMBERS”. > Range of dates : - The soonest the : Starting day of studio closure The soonest the : Starting day of studio closure - The latest the : Closing day of studio + Duration of closure The latest the : Closing day of studio + Duration of closure > Indicate the number of additional days corresponding to the duration of the closure > Indicate a note explaining the closure > Click on “VALIDATE” to save For example : - Holidays from 15/08/2022 to 31/08/2022 - Range of dates : - The soonest the : 15/08/2022 The soonest the : 15/08/2022 - The latest the : 31/08/2022 + 17 days = 17/09/2022 The latest the : 31/08/2022 + 17 days = 17/09/2022 - Number of additional days: 17 days

2. Shifting the billing date of subscriptions

2. Shifting the billing date of subscriptions To shift the billing date of the subscriptions, you need to add a break in the number of days of closure: > Go to “Products” then “Subscriptions” > For each contract, choose “PAUSE” > Add the reason for the closure > Enter the dates of your studio’s closure

- start date (included) start date (included)
- end date (included) end date (included) > Click on “VERIFY” to save

WARNING: PLEASE NOTE - special cases :

WARNING: PLEASE NOTE - special cases : - Subscriptions which the very first invoice starts during the date interval Subscriptions which the very first invoice starts during the date interval Subscriptions which the very first invoice starts during the date interval If a subscription starts during the date range you specify, the very first invoice will be shifted to the end of the break. Example: If you close your studio from December 15 to January 1 and a subscription begins on December 20, the subscription start date will be shifted to

January 2. - Subscriptions created after the pause creation Subscriptions created after the pause creation Subscriptions created after the pause creation All the subscriptions that will be created after the pause has been created have to be manually paused. To avoid this, we advise you to make subscriptions “unavailable for purchase” between the beginning of the interval and the end of your holiday. For example : Make your subscriptions “unavailable for purchase” between 31/07/2022 and 31/08/2022. - Subscriptions with invoices invoiced on the day when I set up my pause Subscriptions with invoices invoiced on the day when I set up my pause Subscriptions with invoices invoiced on the day when I set up my pause In this case all those subscriptions won't be taken into account and no pause will be applied. The list will be indicated when creating the pause and you'll have to wait for the day after to manually pause each of the subscriptions.

CANCEL SCHEDULED ACTIVITIES, WORKSHOPS AND APPOINTMENTS

CANCEL SCHEDULED ACTIVITIES, WORKSHOPS AND APPOINTMENTS - Cancel activities and workshops

Cancel activities and workshops

Go to Calendar Click on the wheel > Click on “Group cancellation Choose the date slot corresponding to your studio closure WARNING: Warning: this operation is irreversible. Warning: this operation is irreversible. Please disable the display of cancelled sessions on the client side, but also on the manager side if you wish, by going to “Settings” then “Personalization” > “Calendar” : - “Show cancelled sessions on the calendar of your members”. “Show cancelled sessions on the calendar of your members”. - “Show cancelled sessions on the calendar your calendar”. “Show cancelled sessions on the calendar your calendar”. 2. Cancel appointments 2. Cancel appointments You must cancel all appointments manually, one by one

3. Removing availabilities

Go to Schedule For each day, select the day and choose “Remove availability” Select all establishments and teachers

WARNING: RECURRENT BOOKINGS CAN STILL BE CREATED FOR THIS PERIOD

If you create recurring bookings after these steps, they can still be created even without availability. Be sure to manually delete any recurring reservations that may have been created in the closed period. Please also activate the option in your appointment settings: “The availabilities of all correctly configured teachers and establishments are automatically managed”:

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7185802-allow-your-practitioners-to-rent-a-room-for-their-consultations>

The idea is to set up private appointments that the member can book, as well as payroll rules that will enable you to track what your practitioners owe you for any room rental. Contrary to their original use, the payroll rules will allow you to know exactly how many hours the practitioner has used your room. With this information, you can invoice them for the hours they owe you.

All you need to do is follow three simple steps: All you need to do is follow three simple steps: - Create private appointments and set-up the availabilities of practitioners (created in teacher's section) from their teacher account, in order to offer slots that can be booked by members. > To help you set up your private appointments, please refer to this article! Create private appointments and set-up the availabilities

of practitioners (created in teacher's section) from their teacher account, in order to offer slots that can be booked by members. > To help you set up your private appointments, please refer to this article! > To help you set up your private appointments, please refer to this article! - Set the payroll rules that will determine how much practitioners are billed for each of their consultations, for the rental of your room. Here, the aim is to set a fixed rate for each consultation: if a member books a one-hour slot, the teacher will have to pay you the amount of his fixed "remuneration". Here's an example: Room rental costs the practitioner EUR50, so I set my payroll rule so that it "pays" (which, in reality, will be billed to the teacher) a fixed rate of EUR50 per consultation. A member books a consultation: this blocks a slot. I find the consultation on the teacher's pay slip. I now know that the practitioner owes me EUR50 for the room rental he used to carry out his consultation with the member. Set the payroll rules that will determine how much practitioners are billed for each of their consultations, for the rental of your room. Here, the aim is to set a fixed rate for each consultation: if a member books a one-hour slot, the teacher will have to pay you the amount of his fixed "remuneration". Here's an example: Here's an example: Room rental costs the practitioner EUR50, so I set my payroll rule so that it "pays" (which, in reality, will be billed to the teacher) a fixed rate of EUR50 per consultation. A member books a consultation: this blocks a slot. I find the consultation on the teacher's pay slip. I now know that the practitioner owes me EUR50 for the room rental he used to carry out his consultation with the member. Don't forget billing! Two options here: Don't forget billing! Two options here: a. Give members the option of paying their appointment card later, and keep all appointments unpaid until the teacher collects the person and registers them on the platform as "Manual Payment". "Manual Payment" WARNING: You will also need to give your practitioners/staff access so that they can manually update the invoice for their consultations/sessions once the member has done his session. OR b. Set the appointment card to 0EUR, so that all your members can book easily and can only pay the practitioner when they arrive at the consultation. WARNING: The practitioner will not have to manually enter the payment in the back-office. The downside is that there will be no real accounting follow-up, as appointment cards will be invoiced at 0EUR.

For further information on how to manage your private appointments, go to the Appointments section of the Help Center.

Source: <https://intercom.help/bsport-helpcenter/en/articles/14210031-how-to-configure-passes-in-bsport-for-frequent-use-cases>

Managing passes effectively in bsport is crucial for ensuring smooth operations and a seamless client experience. This article addresses frequently asked questions related to pass credits, compatibility, and booking, along with actionable steps to resolve them.

Pass Credits Usage and Compatibility

Why did a client s purchased credits not appear when they try to book a class?

If a client s purchased credits do not appear, consider the following steps: - Check for multiple accounts: Verify whether the client has multiple accounts. The purchase and credits might be linked to a different account. Consolidating the correct client account can resolve this issue. It is possible that the client has two separate email addresses registered with the studio. The pass may be assigned to one but not the other. Check for multiple accounts: Verify whether the client has multiple accounts. The purchase and credits might be linked to a different account. Consolidating the correct client account can resolve this issue. It is possible that the client has two separate email addresses registered with the studio. The pass may be assigned to one but not the other. Check for multiple accounts - Check the validity of the pass: If the pass is not appearing it could be expired. You can check the validity of a pass on the members account by searching the members Check the validity of the pass: If the pass is not appearing it could be expired. You can check the validity of a pass on the members account by searching the members Check the validity of the pass: - Check the compatibility of the pass: You can do this through Classes > Group Activities > Select the activity. You will then see the section for “Compatible Passes” at the top. All the passes that are compatible with this activity will appear here. If the pass is not appearing, go to the Passes section > Edit the pass by clicking the pencil > Scroll down and you will see the following: You can restrict a pass by Activity, Category, and/or Establishment. It s important to understand that these filters work with an AND logic, not OR .For example, if a class has the category Hatha Yoga and the activity is Yoga with Lydia , selecting the activity Yoga with Lydia and the category Yoga will make the class incompatible with the pass. This is because the category must match exactly. Hatha Yoga is not the same as Yoga. As a best practice, we recommend setting compatibility using either Activity or Category, rather than both, unless it clearly aligns with your business needs. Check the compatibility of the pass: You can do this through Classes > Group Activities > Select the

activity. You will then see the section for “Compatible Passes” at the top. All the passes that are compatible with this activity will appear here. Check the compatibility of the pass: If the pass is not appearing, go to the Passes section > Edit the pass by clicking the pencil > Scroll down and you will see the following: You can restrict a pass by Activity, Category, and/or Establishment. It s important to understand that these filters work with an AND logic, not OR . Activity Category Establishment AND logic For example, if a class has the category Hatha Yoga and the activity is Yoga with Lydia , selecting the activity Yoga with Lydia and the category Yoga will make the class incompatible with the pass. This is because the category must match exactly. Hatha Yoga is not the same as Yoga. incompatible As a best practice, we recommend setting compatibility using either Activity or Category, rather than both, unless it clearly aligns with your business needs. either Activity or Category By addressing these factors, you can prevent duplicate purchases and ensure credits appear on the correct profile.

Viewing and Booking with Available Credits

Why does a client with a multi-class pass show no credits available when trying to book?

If a pass is configured to be valid from the first booking, you can check this by going to Passes > Edit and clicking the pencil icon. Verify the pass s validity settings. For example, if the pass is set to start from the first booking and the member has already scheduled their first booking for next week, the pass will be valid starting next week. In this case, the member cannot use the pass this week, since its validity begins with their initial booking, which is already scheduled. Passes > Edit - Cancel the existing first-dated booking. Cancel the existing first-dated booking. - Book the earlier session first, making it the new start date for the pass validity. Book the earlier session first, making it the new start date for the pass validity. - Re-add the later booking. Re-add the later booking. This adjustment ensures the pass validity aligns with the client s booking needs.

Why did past bookings appear to consume valid passes after a membership pause ended?

When a membership pause is applied, bookings can still be created during the pause period. Once the membership resumes, the system allocates valid passes to those previously created bookings. This behaviour is expected and ensures that bookings made during the pause are accounted for once the membership is active again.

Conclusion

By understanding and configuring passes effectively, you can resolve common issues related to credit discrepancies, compatibility, and booking. Use the steps outlined above to troubleshoot and optimise pass management in bsport.

How to Manage Unexpected Subscription Charges and Billing Settings in bsport

Source: <https://intercom.help/bsport-helpcenter/en/articles/14432044-how-to-manage-unexpected-subscription-charges-and-billing-settings-in-bsport>

How to Manage Unexpected Subscription Charges and Billing Settings in bsport

Managing subscription charges and billing settings effectively is crucial to avoid unexpected fees and ensure smooth operations. This article addresses common issues related to subscription charges, duplicate payments, and billing date adjustments in bsport, along with actionable solutions.

Understanding Subscription Charges

Why was I charged before my subscription started?

In some cases, you may notice charges before your subscription officially begins. This typically happens when transaction fees from your clients online payments are included in an earlier invoice. For example, a February invoice might reflect only transaction fees (e.g., payment processing fees) and not the subscription itself. In Settings > bsport subscription, you can download the invoice of your payment to bsport under "My Invoices". On this invoice you can see the breakdown of your subscription payment. This will include a field "Payment Fees". These are your Stripe transaction fees for the previous month. You can further review the breakdown of these fees in Reporting > Payments report to confirm the details. transaction fees Settings > bsport subscription My Invoices Reporting > Payments

Why am I still being charged if I thought my contract should have ended?

For bsport subscriptions, the 12-month term starts from the date of the first successful payment, not from the signature date. Here s how it works: - The contract is signed. The contract is signed. - If a free trial period applies, billing starts after that period. If a free trial period applies, billing starts after that period. - The first payment date sets the start of the 12-month term. The first payment date sets the start of the 12-month term. - The term ends after 12 paid months, and the plan renews annually unless canceled in advance. The term ends after 12 paid months, and the plan renews annually unless canceled in advance.

You can further review this on your contract under the heading “VALIDITY AND DURATION”. To avoid unwanted renewals, ensure you submit a cancellation request several weeks before the term ends, as specified in your agreement. as specified in your agreement

Managing Billing Dates and SEPA Transfers

Why was a member charged before the 1st of the month via SEPA?

This happens when the setting to send SEPA transfer orders in advance is enabled. With this option, SEPA payments are initiated a few days earlier to account for banking network delays, so members may see charges dated before the 1st even if the invoice shows the 1st. To ensure charges occur on the 1st of the month: - Navigate to Settings > Billing. Navigate to Settings > Billing. Settings > Billing - Disable the option to send SEPA transfer orders in advance. Disable the option to send SEPA transfer orders in advance. Note: Disabling this option ensures SEPA payments are initiated on the billing date (e.g., the 1st), but enabling it can help account for banking delays.

General Tips for Subscription Management

- Regularly review your subscription settings and billing reports to identify any discrepancies early. Regularly review your subscription settings and billing reports to identify any discrepancies early.
- Communicate billing policies clearly to your clients to avoid confusion. Communicate billing policies clearly to your clients to avoid confusion.
- Submit cancellation requests well in advance to prevent unwanted renewals. Submit cancellation requests well in advance to prevent unwanted renewals. By following these guidelines, you can effectively manage subscription charges and billing settings in bsport, ensuring a seamless experience for both you and your clients.

Source: <https://intercom.help/bsport-helpcenter/en/articles/6912376-how-to-apply-a-substitute-teacher-over-several-sessions>

This feature will be useful if one of your teachers is absent for several sessions and you wish to appoint a substitute for all of these sessions. Step 1: Modify the first session Step 1: In Calendar, select the first session concerned by the teacher's absence. You will then be able to edit it: Step 2: Indicate the substitute teacher Step 2: In the opening box is a section about the teacher by default for the session. You can indicate in the box the person who can replace the usual teacher. Step 3: Apply the substitution to the next similar sessions Step 3: If the selected session is a recurrent course, it will be possible to propagate this modification to the following sessions. To do this, activate the option below: A list of the following sessions will then allow you to check off those concerned by the change of teacher. If another substitute teacher has already been appointed for some of the selected sessions, a list of these sessions will be displayed. You can then choose which substitute you wish to keep. Once the change is saved, the substitute teacher will be indicated as the one teaching the course. It works the same if you want to change or delete the substitute teacher.

Step 1: Create one or more session(s)

Source: <https://intercom.help/bsport-helpcenter/en/articles/3271716-create-edit-cancel-or-delete-your-sessions>

Step 1: Create one or more session(s)

Step 1 To do this, you have 2 possibilities:

From the Calendar

Click on 'Add Sessions': Then select the activity on which you want to add a session and confirm: Once this is done, the session creation form will appear: From this form, - You can personalize the name and/or description of this particular session if you want to showcase a special event such as an anniversary, a themed class etc.. To do so, click on "Set custom name", then enter your new name and/or description and click on Save. The customized name and/or description will be displayed on the backoffice and on the member side each time that the session appears. To go back to the by-default name and description, you can empty the custom fields and Save the session's form. You can personalize the name and/or description of this particular session if you want to showcase a special event such as an anniversary, a themed class etc.. To do so, click on "Set custom name", then enter your new name and/or description and click on Save. The customized name and/or description will be displayed on the backoffice and on the member side each time that the session appears. To go back to the by-default name and description, you can empty the custom fields and Save the session's form. Please note that on Classpass the session will still displayed the original name and description - You can create either a single session or recurring monthly, weekly or daily sessions. You can create either a single session or recurring monthly, weekly or daily sessions. Once the form is completed, click on 'Save' :

From My Studio

My Studio Open the tab and then click on Group Activities to select the activity of your choice: Group Activities Then, click on 'Add sessions': And you will come across the session creation form again.

Step 2: Modify one or more sessions

Step 2 Go to the Calendar and click on the "Edit" button of the session you want to modify Calendar From this form, - You will be able to modify all the characteristics of the session: the activity, the name, the description, the date, the time, the duration, the number of students, the size of the waiting list etc. You will be able to modify all the characteristics of the session: the activity, the name, the description, the date, the time, the duration, the number of students, the size of the waiting list etc. - You will also be able to change the teacher OR select a substitute teacher who will take over the session in the absence of the teacher. You will also be able to change the teacher OR select a substitute teacher who will take over the session in the absence of the teacher. Once this is done, you'll reach a second step where you will be able to inform your clients of the changes made. You will also have the opportunity to modify a single session, or to select the similar sessions you wish to modify. WARNING: This will only modify the FUTURE sessions of this type of session (and not those of the past). WARNING

Step 3: Cancel a session

Step 3 To cancel a session, go to the Calendar, select the session of your choice and click on cancel. Calendar WARNING: This action is reversible, but the reservations and the waiting list will not be restored. WARNING When you click on 'Cancel', a window appears: You will then be able to notify your clients and cancel similar sessions. WARNING: A cancelled session is still visible to the students. To hide cancelled sessions on the client calendar, go to Settings > Personalization. WARNING Settings Personalization

Step 4: Hide a cancelled session

Step 4 - On the Manager side: Click on the wheel at the top left of the Calendar, then 'Hide cancellations' On the Manager side: Click on the wheel at the top left of the Calendar, then 'Hide cancellations' Calendar - On the Client side: Go to Settings then Personalization. Uncheck 'Show cancelled sessions on the client calendar'. On the Client side: Go to Settings then Personalization. Uncheck 'Show cancelled sessions on the client calendar'. Settings Personalization

Step 5: Restore a cancelled session

Step 5 To restore a cancelled session, go to Calendar, then click on the cancelled session. Calendar Click on 'Restore session' : WARNING: Bookings and the waiting list will not be restored, you will have to manually re-register your students. WARNING

Step 6: Delete a session

Step 6 To delete a session, you must have cancelled it beforehand. Once this is done, you can go to the Calendar, then click on the session you wish to delete. Calendar WARNING: It is impossible to delete a session on which there are reservations WARNING

Step 1: Select the option Step 1 Go to Settings -> Personalization -> Select Don't show sessions that the member doesn't have access to with tags -> Save modifications at the bottom of the page Don't show sessions that the member doesn't have access to with tags Step 2: Tag the session Step 2: Create a session -> Click on Advanced -> Add tag Thus, only people who own the selected tag will be able to see the session on the calendar. If you want to know more about tags, here is an article that explains how to create a tag: <https://intercom.help/bsport-helpcenter/en/articles/4418564-exclude-a-customer-from-a-smartlist-using-tags>.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/4126352-view-my-activities-and-workshops>

1st Step: Understand the posting of the group class calendar and the posting of workshops. 1st Step: - When activities are created in My Club > Activities, they will appear, from the customer's point of view, in a calendar showing the week's activities. When activities are created in My Club > Activities, they will appear, from the customer's point of view, in a calendar showing the week's activities. - When workshops are created in My Club > Workshops, they will appear, from the customer's perspective, on a drop-down page with: the workshop photo, description and important information. When workshops are created in My Club > Workshops, they will appear, from the customer's perspective, on a drop-down page with: the workshop photo, description and important information. 2nd Step: Group classes and workshops in the same calendar. 2nd Step: To display group classes and workshops on the same calendar, create the workshops in My Club > Activities. Be careful to note in the title that it is a workshop. The client will see the workshop appear in the group class calendar and can click on it to view all the information and images of the workshop.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7969371-create-a-hybrid-session>

You can create hybrid classes that are both on-site and online. This option is available for both group activities and workshops. Step 1: Create the sessions Step 1: Create the sessions Complete the session creation form with the parameters you want for the on-site session. Activate the toggle named “Hybrid session”. This will create 2 sessions at once: one will be on-site, the other online. It also works when creating recurring sessions, creating duplicate sessions for all recurrences. Note: Hybrid sessions are only available for activities and workshops that have been indicated as not Livestream. Check on your activities and workshops that the “Livestream” checkbox is unchecked. Note: Step 2: Edit the online session Step 2: Edit the online

session The online session is automatically named {Session Name} Online and has by default 100 available spots. You can edit the number of available slots, the size of the waiting list, and the number of credits required for the online session. However, since the online session is linked to the on-site session, other settings such as time and date and teacher can only be modified by editing the on-site session. Step 3: Manage your sessions Step 3: Manage your sessions Hybrid sessions are easily recognizable on the Backoffice Calendar thanks to their specific icon, as well as the helper text that appears when hovering over them.

Step 1 - Create tags

Source: <https://intercom.help/bsport-helpcenter/en/articles/6149203-how-to-add-tags-to-your-sessions>

By adding tags to your sessions you can make them invisible and not bookable for members who don't have the right tags. This feature allows you for example to hide advanced sessions from novice members.

Step 1 - Create tags

Step 1 - Create tags Create your tags from the "Marketing" tab > "Tags". Click here for instructions.

Step 2 - Add tags to sessions from the calendar

Step 2 - Add tags to sessions from the calendar Go to the "Calendar" tab > Click on the session in question > Click on "Edit". In the "Advanced" tab at the bottom, select the allowed and not allowed tags.

Step 3 - Display or not the sessions to which the member does not have access with the tags

Step 3 - Display or not the sessions to which the member does not have access with the tags By default, members who don't have the right tags will not see the tagged sessions on their calendar. You can choose to have them appear on the calendar anyway, the member will not be able to book them. Go to the "Settings" tab > Click on "Personalisation" > Check "Do not display sessions that the member does not have access to with tags". Settings Personalisation Do not display sessions that the member does not have access to with tags If you wish to apply tag restrictions to your appointments, see our related article on How to add tags to your appointments

Intercom

After reading this article, you ll know how to: - View and filter your appointments, group activities and workshops, View and filter your appointments, group activities and workshops, View and filter your appointments, group activities and workshops, - Add, edit or delete availabilities, Add, edit or delete availabilities, Add, edit or delete availabilities, - Understand the color codes and visual indicators used in the calendar, Understand the color codes and visual indicators used in the calendar, Understand the color codes - Manage recurring or shared availabilities for teachers and establishments. Manage recurring or shared availabilities for teachers and establishments. Manage recurring or shared availabilities To access it, log in to your bsport back office and click the Schedule tab from the left-hand menu. Schedule

Page overview and main actions

The Schedule page is your studio-wide calendar for managing studio resources and activities in real time. You can use it to: - Display both activities and appointments in daily, weekly or monthly view Display both activities and appointments in daily, weekly or monthly view Display both activities and appointments - Manage teacher and establishment availability Manage teacher and establishment availability Manage teacher and establishment availability - View who teaches which class and where View who teaches which class and where - Filter by teacher, establishment or activity Filter by teacher, establishment or activity - Identify scheduling conflicts Identify scheduling conflicts Identify scheduling conflicts - Create recurring sessions Create recurring sessions Create recurring sessions - View bookings and unpaid appointments View bookings and unpaid appointments View bookings and unpaid appointments In short, the Schedule page is where you: - Plan availabilities Plan availabilities Plan - Visualize your full activity schedule Visualize your full activity schedule Visualize - Control your resources Control your resources Control - Optimize time management for teachers and establishments Optimize time management

for teachers and establishments Optimize The Schedule page contains several elements that make navigation and scheduling easy: Element Description Date Picker Date Picker Lets you select the week to display. Click on a day of the week to display it and use the arrows to navigate between weeks. Today button Today button Instantly brings you back to the current date in the calendar. Zoom In / Zoom Out Zoom In / Zoom Out Use the + and - buttons to adjust the calendar's vertical zoom level. Zooming in shows more detail by hour; zooming out provides an overview of the whole day or week. View mode (Day / Week / Month) View mode (Day / Week / Month) Switch between different calendar views depending on your needs. The Week view is the most commonly used for managing operations. Week view Group by Group by Lets you organize the calendar by teacher, establishment, or activity. This is helpful when comparing resource availability side by side. teacher establishment activity Filters Filters Allow you to display or hide teacher and establishment availability and to filter focus on specific activity

Understanding the color codes

The calendar uses several colors and patterns to help you identify information at a glance: Yellow highlight indicates the current day: Yellow highlight Solid colors represent available time slots where the teacher, establishment or activity is free to book. Solid colors Please note that availabilities added for specific establishments only will appear with a dark left border: with a dark left border: Please note: Teacher and establishment colors are set to green by default. To customize these colors: Please note: - Open the Appointment tab from the left menu Open the Appointment tab from the left menu Appointment - Select any appointment Select any appointment - Switch to the Calendar view Switch to the Calendar view Calendar - Click on a teacher or establishment name in the filter section Click on a teacher or establishment name in the filter section - Choose your desired color from the picker Choose your desired color from the picker Red dot appears on activities that have been booked but not yet paid. Red dot Striped patterns show when a teacher or establishment is unavailable due to an existing session or appointment. Striped patterns Please note: Striped blocks can appear longer than the activity itself because they include configured Availability buffer times. For example, an appointment with 20-minute buffers will display the teacher as unavailable (striped) from 20 minutes before until 20 minutes after the scheduled time. Please note: Clicking on an activity opens its details (number of participants and linked resources):

Adding an availability

What are availabilities for? By adding availabilities, you make it possible for members to book appointments during the time slots that suit them best, according to teacher and establishment availability. What are availabilities for? To add a new availability: - On the Schedule page, click and drag your cursor across the desired time slot. On the Schedule page, click and drag your cursor across the desired time slot. Schedule drag your cursor - Select Add availability. Select Add availability. Add availability - A window opens: select the establishment(s) and/or teacher(s) A window opens: select the establishment(s) and/or teacher(s) establishment(s) and/or teacher(s) - Click Save. Click Save. Save The new availability will appear on your calendar: Please note: Please note: - Availabilities are created in 30-minute increments (e.g., 30 minutes, 1 hour, 1.5 hours, 2 hours, etc.). Availabilities are created in 30-minute increments (e.g., 30 minutes, 1 hour, 1.5 hours, 2 hours, etc.). - It is not possible to add an availability to multiple days at once. To make a teacher available every day of the week, create one slot per day. It is not possible to add an availability to multiple days at once. To make a teacher available every day of the week, create one slot per day. - Availabilities cannot be edited directly. To modify an existing availability, you'll need to remove it and create a new one. Availabilities cannot be edited directly. To modify an existing availability, you'll need to remove it and create a new one. - You can set up recurring availabilities (weekly recurrence only). You can set up recurring availabilities (weekly recurrence only).

Viewing availability details

Viewing availability details To view an availability's details: - Click and drag your cursor across the desired time slot on the schedule. Click and drag your cursor across the desired time slot on the schedule. - Then select "Availability details : Then select"Availability details : Availability details - In the pop-up window,

view the availability details (time, teacher and/or establishment) In the pop-up window, view the availability details (time, teacher and/or establishment) availability details

Removing an availability

- Click and drag your cursor across the desired time slot on the schedule Click and drag your cursor across the desired time slot on the schedule
- In the pop-up window, click Remove availability In the pop-up window, click Remove availability
- Choose which establishment or teacher to remove Choose which establishment or teacher to remove
- Click Save Click Save Save

Managing overlaps and conflicts

When a teacher, location or activity is already booked for another class or appointment: - The time slot will display a striped pattern. The time slot will display a striped pattern. striped pattern - You will not be able to create a new availability or event at that time. You will not be able to create a new availability or event at that time. This logic applies to: - Individual appointments Individual appointments Individual appointments - Group activities and workshops Group activities and workshops Group activities and workshops - Recurring availabilities Recurring availabilities Recurring availabilities

Multi-teacher and multi-establishment availabilities

You can create an availability for: - Multiple teachers (when more than one person can lead a class) Multiple teachers (when more than one person can lead a class) Multiple teachers - Multiple establishments (if the session can occur in any available establishment). Multiple establishments (if the session can occur in any available establishment). Multiple establishments We only display availabilities that match all selected criteria, meaning that each selected resource must be free at the same time. If one teacher or establishment is unavailable, the slot will appear as unavailable. each selected resource must be free

Using filters

The Schedule view includes several filters to help you focus on the information that matters most: Filter Purpose Establishment Establishment Display or hide establishment availability Teacher Teacher Display or hide teacher availability Activity Activity Filters the view by activity type (Group activities & workshop, Appointments, Tasks / personal appointments) Use filters to quickly isolate a single teacher, establishment or activity type. You can also switch between day, week, or month views depending on how much detail you need. day week month The Group by option lets you organize the view by Establishment, Teacher or Activity. This allows you to view filtered teachers, establishments or activities side by side for easier comparison. Group by Establishment Teacher Activity

Access-Control (9 articles)

Manual Entry

Source: <https://intercom.help/bsport-helpcenter/en/articles/12620345-understanding-access-control>

Access Control refers to the different tools available on bsport that allow you to manage who can access your studio. The overall logic of Access Control is the same across all tools; however, there are two ways for your members to gain access:

Manual Entry

Manual entry is designed for studios without automatic doors but with staff at the reception desk to welcome members. The staff can use a barcode scanner to retrieve member information and decide whether to grant access.

Auto Entry

Auto entry is designed for studios equipped with automatic doors and typically operating without staff at the reception. The process is fully automated: members simply click to open the door, and the system determines whether they are allowed to enter.

Let's get started

Let's see how to set up Access Control based on the type of entry you've selected. - Activate manual entry
Activate manual entry - Activate auto entry Activate auto entry

Scanner configuration

Source: <https://intercom.help/bsport-helpcenter/en/articles/9286023-how-to-activate-access-control-manual-entry>

Before reading this article, make sure you've read this one first. Manual entry allows you to check member access validity in real-time and ensure that only authorized members enter your studio. Most important member information is quickly displayed your studio's receptionists to ensure a seamless flow, both for your members and your staff.

Scanner configuration

Step 1 - Order the scanner

Before monitoring the visits to your studio, you will have to order the scanner(s) that will be used to scan members' barcodes on their app. Note that the scanners are not included in the feature and their cost has to be covered by the studio. Here are the scanner references that we recommend: Honeywell Genesis 7580g or Newland FM3056. Honeywell Genesis 7580g Newland FM3056. We recommend these scanners as we were able to test them and make sure the feature is working properly. However, they are not the only scanners on the market that are compatible. If you wish to use another reference, make sure to meet the following requirements:

- Be able to read barcodes on screens
- Be able to be plugged into the reception PC via a USB cable
- The configuration of the scanner must allow a high-speed reading mode (otherwise the scanning will not trigger a visit but only the display of a text)

The configuration of the scanner must be able to allow the display of the following format after reading a barcode: "A+number" (for example A629658220923). Please note that should you go for another reference than the recommended one, we can not guarantee that the feature will work properly.

Step 2 - Configure the scanner

Follow the steps of the following documentation to configure your chosen barcode reader: Honeywell barcode scanner configuration or Newland barcode scanner configuration and check that it results in the display of

the correct format

Staff configuration

Once the feature is available on your back-office, go to the Staff page in Settings

Step 1 - Create a receptionist role

If you do not have a role dedicated to the reception yet, click on “Add role” and name it. If you already have such a role, click on the Edit icon. For the permissions, give at least the permission to “Perform access monitoring” in Navigation menu > Access Monitoring. permission to “Perform access monitoring” We also recommend permitting the “Access location visits history” to facilitate the receptionist tasks. Access location visits history For the other permissions, please refer to our helpsheet on the permission details and select what better corresponds to the actions that you want to allow your receptionists to do.

Step 2 - Create a receptionist staff account

Each receptionist staff account will be able to monitor visits from a fixed place where a scanner and reception desk will be posted. You can create as many receptionist staff accounts as you have areas to monitor entry for. For example, you may wish to create a receptionist staff account for the general entry of one of your studios, another one for the entry of a specific sub-part of the studio, and another one for the general entry of another studio. To do so, click on “Add staff”, name it, and enter the generic email and password that will be used when logging in to the computer placed at the entrance of the area. Then select the “receptionist” role In the Teacher restriction section, if wanted, apply restrictions on some of the teachers (for more information see our helpsheet on How to restrict the permissions granted to your staff accounts.) In the Access Monitoring section, indicate here the area for which this access will monitor visits. - If the desk is at the general entrance of the studio, select the location/address of the studio and leave the establishment field empty (if empty, all establishments are considered selected by default) If the desk is at the general entrance of the studio, select the location/address of the studio and leave the establishment field empty (if empty, all establishments are considered selected by default) - If the desk is at the entrance of a specific area of the studio, select the location/address of the studio and the establishment(s) that belong to this area If the desk is at the entrance of a specific area of the studio, select the location/address of the studio and the establishment(s) that belong to this area Then click on Save. The receptionist staff account will be added to the list of staff accounts. You can repeat this step as many times as you need receptionist access. If you already have a receptionist staff account or if you want to edit the selection, click on the Advanced Settings button and update the Access monitoring selection. Note that a receptionist staff account without at least a location/address selected will not be able to monitor entries.

Learn how to set up Access Control

Now that Access Control is activated, let’s see how to properly set up your Back Office to define the entry rules.

Connect bsport to Kisi

Source: <https://intercom.help/bsport-helpcenter/en/articles/11906806-how-to-activate-access-control-auto-entry>

Before reading this article, make sure you’ve read this one first To allow auto entry, bsport is partnering with Kisi. Before going further in this article, it is mandatory to get in contact with Kisi so you are fully onboarded and your Kisi account is set up with all your doors configured and correctly linked to hardware. Once this is done, you can go on with this article.

Connect bsport to Kisi

Create a group on Kisi

First you will need to create a Group in Kisi. We will use this group as the access rules for your members. You'll be able to define the doors to which your members will have access to (if you have multiple doors). But also during which time period of the day your members can have access to the doors. - In Kisi, go to Groups and then Add Group In Kisi, go to Groups and then Add Group - Fill the name and description. We recommend indicating clearly in the name that this group is for the bsport users. Fill the name and description. We recommend indicating clearly in the name that this group is for the bsport users. - We recommend NOT to toggle Scope to a Place. This allows for more flexibility in the future as this is a setting that cannot be changed once the group is created. We recommend NOT to toggle Scope to a Place. This allows for more flexibility in the future as this is a setting that cannot be changed once the group is created. - Click on Add Click on Add Once your group is created you should: - indicate to which door this group has access to indicate to which door this group has access to - set up the access schedule to make sure your members won't be able to enter when the studio is not opened set up the access schedule to make sure your members won't be able to enter when the studio is not opened You can do so by following Kisi helpsheets [here](#).

Create a user

We now want to create the user bsport is going to use to unlock the door. We will assign to this user the group create previously, so that members can only access your studio at the right time. - On Kisi go to Users and click on Add Users On Kisi go to Users and click on Add Users - Indicate an email address Indicate an email address You need to be able to access this email address as your are going to receive an email on it - Indicate a name. We recommend bsport Indicate a name. We recommend bsport - Then click on Share Access Then click on Share Access - In the modale, select the group we just created In the modale, select the group we just created - In Role, select Group Manager In Role, select Group Manager - Make sure the Notify the User toggle is activated Make sure the Notify the User toggle is activated - Click on Share Click on Share - And then Add And then Add Your user just received an email, open it and follow the steps to create a password. Then connect to this account.

Get the API Key

To connect bsport to Kisi, you will need to provide the Kisi API key of the user we just created to your Account Manager. Here is how to find your API key: - Make sure your are connected to the user you just created Make sure your are connected to the user you just created - In the top right corner, click on your email and select "My Account" In the top right corner, click on your email and select "My Account" - In "My Account", select "API" from the menu on the left and click "Add API key" In "My Account", select "API" from the menu on the left and click "Add API key" - In "Name", indicate "bsport" In "Name", indicate "bsport" - In "Password", indicate the account password In "Password", indicate the account password - Copy the API key and send it to your Account Manager Copy the API key and send it to your Account Manager - Wait for your Account Manager to confirm that the link between bsport and Kisi has been established. Wait for your Account Manager to confirm that the link between bsport and Kisi has been established.

If you are a franchise

If you are a franchise or a brand using the bsport Master Account. And if you have multiple studios in your Master Account using Access Control auto entry, please repeat the previous steps for each of your franchisees/studios that need Access Control auto entry. - Create one group for each franchiseesIndicate in the name which franchisee this group controlsIn the groups make sure you select only the doors belonging to the given franchisee Create one group for each franchisees - Indicate in the name which franchisee this group controls Indicate in the name which franchisee this group controls - In the groups make sure you select only the doors belonging to the given franchisee In the groups make sure you select only the doors belonging to the given franchisee - Create one user for each franchisees and assign it the right group Create one user for

each franchisees and assign it the right group - Generate an API Key for each usersMake sure to indicate clearly to your Account Manager which API Key belongs to which franchisee Generate an API Key for each users - Make sure to indicate clearly to your Account Manager which API Key belongs to which franchisee Make sure to indicate clearly to your Account Manager which API Key belongs to which franchisee

Choose your security method

Auto entry is based on a click-to-open logic. Meaning that your members can open doors through their app by clicking on a button. Learn how this works by following this helpsheet. In order to prevent fraud, you want to make sure that your members are actually close to the door when opening it. To reduce this risk, we have different ways to protect your studio: - geofencing geofencing - proximity proof proximity proof Please select one of the following security protections and reach out to your account manager for them to activate it. Whatever method is selected, members always have to be connected to the internet if they want to be able to open doors.

Geofencing

Geofencing defines a radius around your doors in which a member has to be in order to be able to unlock said doors. To activate it, please contact your Account Manager and give them the radius (in meters) within which members should be in order to unlock doors. We recommend setting a radius of at least 500 meters around your entrance. This allows for normal variations in phone localization accuracy due to GPS and network conditions. Wait for your Account Manager to confirm that everything is in place. **WARNING:** If you have enabled geofencing on bsport, make sure the “Geofence restriction” toggle is disabled in your Kisi interface. bsport runs its own geofencing layer: having both active at the same time will prevent access from working entirely. “Geofence restriction” disabled

Proximity proof

Proximity proof uses Bluetooth to make sure that the member s phone is next to a reader. If it s the case, the member will be able to open the door. If they are too far from the reader, the door won t open. In this scenario, the members still have to click to open the door inside the app. For proximity proof to work, you need to have a reader for each of your doors. You can order your readers here. We advise the Reader Pro 2.1 (High frequency). **WARNING:** Only Kisi reader is compatible with proximity proof. You cannot use another reader. Only Kisi reader is compatible with proximity proof. You cannot use another reader. To activate it, please contact your Account Manager. If you chose this option, please follow the installation guide for proximity proof here.

Learn how to set up Access Control

Now that Access Control is activated, let’s see how to properly set up your Back Office to define the entry rules.

Set up your passes and subscriptions

Source: <https://intercom.help/bsport-helpcenter/en/articles/12620650-set-up-access-control>

This article applies to both auto entry and manual entry. You can check the definition here. Now that Access Control is enabled on your studio, let’s see how to set up your passes and bookings to allow your members to enter.

Set up your passes and subscriptions

Passes

To allow your members to enter your studio, they will need to own a pass or subscription giving them access in order to do so: - In the pass creation flow or edition flow, go to the “Door Access” section In the pass creation flow or edition flow, go to the “Door Access” section - Activate the toggle “Grant studio access” Activate the toggle “Grant studio access” For auto entry only, once activated, this pass will allow all the members owning it to open every door in your studio. This will also apply to passes already owned by members before the toggle was activated. open every door The rights to access the studio will remain valid as long as the pass has not expired. If this pass is used in a subscription, this subscription will also give access to the studio to the members subscribed. For a pass used in subscriptions, we advise you to indicate “Valid from the billing date” as the start date of the pass.

Valid from first use

If you granted studio access to the pass, you’ll see a new option in the start date options for your pass: Valid from the first use. This option can be used for day passes for example. To learn how to set up this kind of pass, please follow this helpsheet.

Off peak passes

On passes, you can restrict booking to certain times. But this option is also compatible with Access Control. This way you can indicate if the pass gives access to your studio on a specific day on specific hours.

Establishment access

For manual entry you can define if a pass gives access to certain establishments using the restrictions on establishments. By default a pass will give access to all establishments.

Appointment passes

Appointment passes also have the same toggle to grant access. However, they do not have the valid on first use option or off peak compatibility.

Establishment access

This feature only applies to manual entry. Just like for passes, you can define to which establishments the appointment passes can give access to. To do so we will use the “Compatible appointments” section. If the compatible appointments have a given establishment, the appointment pass will give access to said establishment.

Entry based on bookings

If you have appointments, group classes or workshops in your studio and you wish that your members could enter if they have an upcoming session (even without a pass, giving them full access), you can activate this feature. Go to Access > Settings By default, the timeframe for entry is less than 59 minutes before the session starts and less than 15 minutes after it has started. You can edit it if needed. Then enter the new timeframe to be taken into account and click on Save Note that this setting is shared by all sessions and all locations. If you wish not to activate this feature, please reach out to your account manager. not to activate reach out to your account manager.

Access Control logic

Everything is set up for your studio, now let’s understand the logic of Access Control and how it decides who can enter or not. Let’s continue on this article.

The member can enter

Source: <https://intercom.help/bsport-helpcenter/en/articles/11928132-understand-the-logic-of-access-control-and-monitoring-entries>

The following logic applies for both manual entry and auto entry, please remember that: Manual entry allows you to check member access validity in real-time and ensure that only authorized members enter your studio. Most important member information is quickly displayed to your studio's receptionists to ensure a seamless flow, both for your members and your staff. Manual entry Auto entry allows your member to enter autonomously in your studio. This feature removes the necessity of manually controlling each entrance and enables your staff to focus on what is truly important. Auto entry Since everything happens under the hood, it is important for you to understand the logic of Access Control, to know when a member can enter and when they cannot. Before reading this article, make sure you've set up everything correctly for Access Control to work. - Set up for manual entry Set up for manual entry - Set up for auto entry Set up for auto entry - Common set up Common set up See how your members can find their access credentials here.

The member can enter

For a member to be able to enter the studio we will check the following:

1 - Localisation

To make sure the member is at the right place, the system will check the localisation of the member. For manual entry and auto entry the method used is not the same:

Manual entry

Localisation will be based on the establishment linked to the staff connected. Only members with passes or bookings compatible with the staff's establishment will be able to enter.

Auto entry

Localisation will be based on the geolocation of the member's phone. Members will be able to enter only establishments with which their passes or bookings are compatible. This only applies to passes and group classes. Not appointments or appointment passes.

2 - Checking on the passes and subscriptions

Then we will check if the member owns at least one pass with Grant studio access activated. - If not, we'll move on to part number 3. - If yes, we'll move on to the other checks of this section. If yes, we'll move on to the other checks of this section. Then we'll check if the pass is valid and active: - The check-in date must be inside if the pass validity period. The check-in date must be inside if the pass validity period. - The pass shouldn't be blocked. We strongly advise you to activate the feature Deactivate subscriptions when payments fail in order to block passes linked to subscriptions when a subscription is unpaid. You can activate it in Settings > Billing. The pass shouldn't be blocked. - We strongly advise you to activate the feature Deactivate subscriptions when payments fail in order to block passes linked to subscriptions when a subscription is unpaid. We strongly advise you to activate the feature Deactivate subscriptions when payments fail in order to block passes linked to subscriptions when a subscription is unpaid. - You can activate it in Settings > Billing. You can activate it in Settings > Billing. - The pass shouldn't be reverted (linked to a cancelled invoice). The pass shouldn't be reverted (linked to a cancelled invoice). - If the pass is part of a subscription, the subscription should not be currently paused. If the pass is part of a subscription, the subscription should not be currently paused. - If the pass is restricted to certain times, the entry should be in the given day and hours. If the pass is restricted to certain times, the entry should be in the given day and hours.

3 - Checking on upcoming appointments

This feature has to be activated, see how. If this feature is activated and the member did not validate the checks of section number 2, we will check if the member has an upcoming booking and this session is coming up in the indicated buffer time, then access will be granted

Valid status

If the member validates all the conditions above, they will get the green status: - For manual entry: it means the member can enter For manual entry: it means the member can enter - For auto entry: it means the door will open For auto entry: it means the door will open If the member has a booking planned before the end of the day, you will be able to see it in the Next Booking section. You can expand this section to see the name of the session's teacher and the number of the member's spot if applicable. From here you can also see which pass the member is using and if necessary, you can open the member profile, or bill the member with a new item.

Warning status

In this case the member as validated all the previous checks to enter, however there are some warnings to be aware of: - the member has a session planned in an establishment not compatible with the zone that you are monitoring access for (manual entry only) the member has a session planned in an establishment not compatible with the zone that you are monitoring access for (manual entry only) - the member uses a pass not compatible with the zone that you are monitoring access for (manual entry only) the member uses a pass not compatible with the zone that you are monitoring access for (manual entry only) - the member has a session in a compatible establishment but has an unpaid invoice or a negative account balance the member has a session in a compatible establishment but has an unpaid invoice or a negative account balance - the member has a session in a compatible establishment but does not have a pass the member has a session in a compatible establishment but does not have a pass - the member has recently changed their profile picture the member has recently changed their profile picture The behavior is not going to be the same if it's for manual entry or auto entry: - Manual entry: An action is required on your part to regularize the member's status and address the warnings before letting the member enter or not. Manual entry: An action is required on your part to regularize the member's status and address the warnings before letting the member enter or not. Manual entry: - Auto entry: The door will still open for the member. However, in the entry history you will see the warning status on the member. Auto entry: The door will still open for the member. However, in the entry history you will see the warning status on the member. Auto entry:

Acknowledge and address warnings

This part is only meant for manual entry All warnings will appear below the member information and can be addressed from here. The warning regarding a recent change in the profile picture is the only exception and is displayed next to the member picture To address this warning, please make sure that the member checking in is the same person as shown on the picture. To do so, click on "See previous" and open the picture history. If you can confirm that the member matches their picture, click on "Validate identity". The warning will then disappear. Once you have acknowledged all warnings and if you have addressed some or all of them, you can click on the button "Refresh status". If all warnings were addressed and the status of the member has changed, you will be notified in the member information

Indicate if the member is allowed to enter or not

If the member has a warning status, you will have to indicate if the member is allowed to enter or not. You can decide to allow a member to enter even if not all warnings were addressed, depending on the type of warning and your studio's policy. To do so, either click on "Refuse entry" or "Allow entry" From here you can choose to close or to stay on the member page if you want to continue seeing the member information and warnings. For auto entry, "Allow entry" will be selected automatically.

Not valid status

This status means that the member doesn't have the right to enter. Actions are required on your part and the member is not allowed to enter as long as warnings are not addressed. What is expected from you is not the same if it's for manual entry or auto entry: - Manual entry: Check on why the member cannot enter and try to solve the situation. Manual entry: Check on why the member cannot enter and try to solve the situation. Manual entry: - Auto entry: The door will not open to the member. Auto entry: The door will not open to the member. Auto entry: From here you can address the warnings and refresh the member status as explained above, or communicate to the member that they cannot enter

Access history of visits

To see the history of all member's visits that day, go to Access and click on the Location Visits tab If you are a receptionist of the studio, you will see all visits of members who checked in at your desk (only for manual entries, for auto entries you will see all entries). If you are an administrator or owner of the studio, you will see the visits of all members who checked in at one of the studio's receptions. The visit reason will indicate the name of the session the member came for. If there is no session, then it indicate "None". From here you can open again the member's information by clicking on the button on the right You will be then able to perform the same actions as mentioned above or go back to the visit history Note that at the end of the day, the history will be refreshed and emptied. To have a full list of members' visits to your studio on a certain period, you can consult the report Access Monitoring in Reporting.

Set up the validity period

Source: <https://intercom.help/bsport-helpcenter/en/articles/12621911-access-control-passes-activated-on-first-use>

If you granted studio access to the pass, you'll see a new option in the start date options for your pass: Valid from the first use. This option is meant to create "Drop-in passes". Those passes can be used to give one-day access to members who are not subscribed, for example. "Valid from the first use" passes become active when a member checks in for the first time (opens a door to access the studio or scans their barcode) or does a first booking. Then the pass will be valid for the given number of days (a day, a week ...).

Set up the validity period

- In the validity section select "Valid from the 1st use (booking or check-in) In the validity section select"Valid from the 1st use (booking or check-in)
- Then, define the "Activation period". The activation period is the time during which the pass is not activated yet; it's waiting for either a first check-in or booking. If the member doesn't do any of these actions during the activation period, then the pass will expire. Then, define the "Activation period".
- The activation period is the time during which the pass is not activated yet; it's waiting for either a first check-in or booking. If the member doesn't do any of these actions during the activation period, then the pass will expire. The activation period is the time during which the pass is not activated yet; it's waiting for either a first check-in or booking. If the member doesn't do any of these actions during the activation period, then the pass will expire.
- Then define the validity period of your pass. Once activated, your pass will become valid for the duration indicated. Your members will be able to access the studio only during the given period. Then define the validity period of your pass.
- Once activated, your pass will become valid for the duration indicated. Your members will be able to access the studio only during the given period. Once activated, your pass will become valid for the duration indicated. Your members will be able to access the studio only during the given period.

Activation

This pass will be activated with the following actions:

- A first booking: The pass validity will start on the date of the booked session
- A first check-in: The member accessed the studios using this pass (opened a door or scanned their bar code)
- The member accessed the studios using this pass (opened a door or scanned their bar code)

First booking edge case

- If the first booking of this pass is canceled and there is no other bookings done with the pass: The pass validity will fall back to the activation period and will be waiting for another booking or first check-in.
- If the first booking of this pass is canceled and there is another booking: The pass validity will start on the date of the next closest booking in time.
- The pass validity will fall back to the activation period and will be waiting for another booking or first check-in. The pass validity will fall back to the activation period and will be waiting for another booking or first check-in.
- The pass validity will start on the date of the next closest booking in time. The pass validity will start on the date of the next closest booking in time.

Manual activation

Passes that activate on first use can be activated manually by going on the member profile in the “passes” tab. Clicking on the “Activate” button, activates the validity of the pass. This button appears only if:

- the pass is activable on first use
- there has been no first check-in
- the pass is not expired

Note the button still appears even though a first booking has been done. The goal is to allow your staff to change the activation date to today if a member comes to the studio and wants to have access before the day of their first booking. This comes in handy for drop in passes that are valid for a week. It is important to note that if the new start date of the pass, makes it so that some bookings are not inside of the validity of the pass anymore, the bookings will not be canceled automatically. The staff will be warned and will decide what to do.

Manual entry

Source: <https://intercom.help/bsport-helpcenter/en/articles/11928083-how-can-my-members-access-my-studio>

Access Control needs to be activated on your account for this feature to appear on your members’ app. Remember that for Access Control, there are 2 ways for your members to enter:

- Manual entry
- Auto entry

The flow to enter will be different based on which method is used to enter.

Manual entry

Note that if you are logged in as an administrator or owner of the studio, you will not be able to scan members, but you will always have access to the live list of members’ visits. The members checking in at the reception desk can now scan their bar-codes visible on their studio app in the Profile tab

Tips to optimize the scanning:

- barcodes are detected more easily by the scanner when they are compact i.e. not too zoomed in on the screen
- barcodes are detected more easily by the scanner when they are compact i.e. not too zoomed in on the screen
- if possible, avoid placing your mouse cursor in an active text field in the back-office if possible, avoid placing your mouse cursor in an active text field in the back-office

Note that the members’ bar-codes cannot be scanned if your active tab is not a tab of the back-office (for example any Google page) Each time

a member scans their bar-codes, you will see a notification indicating the member's name and entry status. If you wish to see more information about this member entry, click on "Open".

Auto entry

Auto entry uses the logic of click-to-open, meaning that your members will have a button in their app in order to be able to unlock your doors.

Unlock a door

In their app, your members will have to: - Go to their Profile tab Go to their Profile tab - Click on the "Unlock door" button Click on the "Unlock door" button - A list of all the doors will appear A list of all the doors will appear - Your member will have to select which door to open Your member will have to select which door to open - Then click on Unlock Then click on Unlock Depending on the logic explained here your member will then be able to enter or not.

Goefencing and proximity proof

If the Geofencing or proximity proof feature has been activated, your members will have to allow their phone to share their location. If not, the app will ask them again to accept. If they don't, they won't be able to open doors. It is important that your members activate their exact location (normally activated by default on IOS and Android). If not, the phone will only provide an approximate location, which could prevent members from entering.

Check on a member status

You can always check on a member's status even if the member didn't try to enter. This can happen if your member doesn't have access to their smartphone or if there are any issues with the hardware. The following actions can only be done by a staff member with the right permissions. Owners do not have the permissions to do so.

Searching for a member in the search bar

Searching for a member in the search bar From any page of the back-office, click on the member search bar on the top right of your screen and search for the member's name or email. Then on the list of results, click on "Member entry" next to the member name You will see a notification indicating the member's name and entry status. If you wish to see more information about this member entry, click on "Open"

Searching for a member in the Member Visit tab

Searching for a member in the Member Visit tab First, on the navigation menu, click on "Access" to open the Access Monitoring page in a new tab. Then on the Member visit page, click on the member search bar and search for the member name or email. On the list of results, click on the right member. The information about this member visit will now appear on the same page. In the case of auto entry, the manual checks will no open the door. You can do it by going on the Kisi interface.

Plug your reader

Source: <https://intercom.help/bsport-helpcenter/en/articles/13350916-how-to-activate-proximity-proof-for-auto-entry>

Before reading this article, make sure you read this one first. Now that your Account Manager has activated the feature and you've received your readers, you'll have to set them up for the feature to work.

Plug your reader

First, you'll have to plug in your reader and connect it to the internet. To do so, you can follow Kisi's help sheets. - To install your reader on the wall To install your reader on the wall - To wire your reader To wire your reader

Our tip

Wiring your reader may not work from the get-go, as most Ethernet wall sockets do not supply power. You need a Power over Ethernet socket. Most of the time, these sockets have 2 LEDs, one for power, the other for the internet. If your router or wall socket doesn't have this kind of port, then you will need a power injector. Here is an example of one. To note: We didn't test this product ourselves and cannot assure good functioning. Reach out to Kisi if you have any doubts. To note:

Set up on Kisi

Once your reader is properly plugged in, you'll have to set up the reader on the Kisi backoffice to connect it to the desired door. To do so, follow Kisi's help sheet. Once you are done, in the Kisi backoffice: - Select the corresponding place Select the corresponding place - Click on Doors in the left side menu Click on Doors in the left side menu - Select the wanted door Select the wanted door - Go to Permissions Go to Permissions - Activate Reader Proximity Restriction Activate Reader Proximity Restriction - Save Save You can also select how close your members should be to the reader to be able to unlock the door. To do so: - Select the corresponding place Select the corresponding place - Go to Hardware Go to Hardware - Scroll down to Sensitivity Scroll down to Sensitivity - Change it to the wanted value Change it to the wanted value - Save Save

Our tip

There is no need for your members to tap their phone on the reader. This will actually activate NFC (Apple Wallet, Google Wallet...), which will override the bsport interface. We recommend that your members simply step in front of the door and unlock it from there.

Controller (must have)

Source: <https://intercom.help/bsport-helpcenter/en/articles/13671343-which-hardware-to-order-for-access-control-auto-entry>

In order to make sure your Access Control auto-entry installation works as best as possible, it's important to have a clear mind the hardware you need to order from Kisi.

Controller (must have)

The controller is the only must-have piece of hardware for this integration. This piece of hardware is going to be wired to your door. It does the link between the door and Kisi. This is how Kisi can control your door and send orders to open the door or stay put. Without this piece of hardware, we cannot make the link between what happens on the software and what happens in the real world. To know about the controller: - Controller is free thanks to bsport and Kisi partnership Controller is free thanks to bsport and Kisi partnership free - You can order it here You can order it here You can learn how to install your controller by following Kisi's helpsheet: - Wire and install your controller Wire and install your controller

Reader (optional)

The reader is only necessary if you want to use proximity proof (see). Thanks to the reader and using Bluetooth, we will know that your members' phone is next to the door when they try to open it. To know

about the reader: - Reader costs 475\$ (one-time payment) Reader costs 475\$ (one-time payment) - You can order it here You can order it here Learn how to install your reader here.

Other cases

In the case you already have a controller or reader from another provider, and you wish to keep them. You'll have to check with Kisi which hardware is needed to make your previous hardware compatible with the new one. Anyway, you'll have to order a controller.

Delivery time and custom fees

Kisi is based in the US. Take into account a 1-month delivery time if you are in Europe. Also, it is important to check the customs fees in your country when it comes to deliveries from the US.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/6003417-how-to-force-registration-for-all-sessions-of-a-workshop>

Step 1 : Create the workshop and the corresponding pass Step 1 In My Club > Workshops > Add a Workshop Let's imagine a workshop of 3 sessions. You will need to create 3 different workshops (one for each session), configuring the first one as the one to be reserved for the client. You will have to specify in the description of the workshop that the reservation of the workshop will imply access to all the sessions: Click on Save, then create the corresponding pass making sure to put the right number of credits according to the number of sessions (here 3): Then make sure to tick the corresponding activity (here Workshop Example): Step 2 : Create the other workshops (for the other sessions), taking care to configure them properly. In this example, the workshop includes 3 sessions, so 2 other workshops have been created. Step 2 These workshops will be displayed in the marketplace, but cannot be booked by members. Indeed, it is the studio manager who will manually register them for the other sessions, once the Example workshop pass has been purchased. It is therefore important to make sure that this information is included in the description of the workshop. - 2nd Session : 2nd Session : Important : "Limit future bookings of members that take place in" : Put '0' days to prevent clients from being able to book this session. Important : " Session 3: Same procedure as session 2 Step 3 : Finalise the configuration of corresponding pass Step 3 You have to go back to the options of the corresponding pass and make the added sessions compatible. Here, in step 1, we had made pass compatible with the Example Workshop. This time we also need to make it compatible with sessions 2 and 3: Step 4 : Once the client has registered for the first session of the workshop, it is up to the manager to register him manually for all other sessions (in this example. sessions 2 and 3) Step 4

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7233596-invisible-products-to-staff-from-the-back-office>

If you have created products that should not be sold outside of a subscription or package, you can make them unavailable for sale in the backoffice. This will prevent your staff from selling these products independently. Step 1: Modify or create the product to be hidden from the backoffice Step 1: This option is only available for passes, packs, and subscriptions: go to the page corresponding to the one you want to hide from the backoffice. Click on Add if it is a new product or on the pencil icon if you want to modify an existing product. In the creation/editing form, activate the "Invisible for the staff" option: Step 2: Check that the product is invisible on the backoffice Step 2: First of all, you can find the hidden products for the backoffice thanks to the icon that is added on the product: You can also check that the product no longer appears from the billing points on the backoffice: Your product is now invisible! If you want to make it accessible again, just go back to the product modification form and deactivate the option.

You can configure a pass so that it is only compatible with sessions during certain hours of the week. It can help boost class attendance during quieter hours. Off-peak passes can be created from studio's back-office and from franchise master account. Step 1: When creating or editing a pass, activate the option "Limit bookings to certain time slots" Step 1: Step 2: Configure the time slots for which the pass will be compatible. Step 2: You can choose between defining time slots or defining all day as compatible. Step 3: You can define groups of time slots, which apply to the same days of the week. Step 3: Result on the studio side: On the Backoffice, the pass details page displays its time restrictions. Result on the studio side: On the member's side: On the member's side: When a member purchases the pass, they can see that its use is restricted to specific hours. The pass cannot be used outside the specified time slots. Please note that a session that is partly within the defined time slots and partly outside will be considered as outside the defined time slots, i.e. the pass cannot be used. For sessions within the time slots, the pass works as usual.

Source: <https://intercom.help/bsport-helpcenter/en/articles/6117685-understanding-the-theoretical-marginal-value>

When creating a pass with unlimited credits, it is possible to add the theoretical marginal value including VAT. This tool allows you to estimate the specific value of a booking, and is mainly used to calculate the teacher payroll. For example, inputting 10EUR means that the value of the booking made with this pass is 10EUR. If left empty, the marginal contribution is calculated as follows: Price of the pass /Number of reservations made by the member with that same pass. Price of the pass /Number of reservations made by the member with that sam

Source: <https://intercom.help/bsport-helpcenter/en/articles/7973720-create-an-early-bird-pass>

When creating a pass, an appointment pass or a pack, you can set up a date limit for purchase. This is not the expiration date for the validity of the pass, but a limit after which members can't buy the product. Once the date limit is reached, the product will still exist but will not appear on the Marketplace. This feature is especially useful to apply an early bird pricing strategy, in which the product is sold at a discount, but the customers have to buy it quickly before the opportunity disappears.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7262426-penalties-on-no-show>

Sometimes some of your members do not cancel their session and do not come to it. In order to avoid this type of situation, it is important to be able to make your members aware of the need to cancel their session in good time if they do not wish to attend. In this sheet, you will learn how to apply penalties to your absent members who used an unlimited pass to make their booking. Note: Penalties are only applicable to unlimited passes. Note: Step 1: Apply a penalty on unlimited passes Step 1: To apply these penalties on no-shows, you must indicate it on the unlimited passes. So, go to Product > Passes and create or modify an unlimited pass. You will then be able to apply a penalty: Select the one concerning no-shows: You can also select in parallel the penalties for late cancellations as they are independent. Then define the number of no-shows from which you wish to penalize a member with an unlimited pass: And finally, choose the penalty you wish to apply to him. You have the choice between : - Temporarily block the unlimited pass used for booking. In this case, you must indicate the number of days the pass will not be usable Temporarily block the unlimited pass used for booking. In this case, you must indicate the number of days the pass will not be usable - Deduct an amount (to be defined) from the customer balance. Deduct an amount (to be defined) from the customer balance. You can set different penalty settings depending on the unlimited passes. Step 2: Triggering the roll call Step 2: When you create a penalty on no-shows for the first time: a message tells you that you have unlocked the possibility to "Make the roll call". To find out more, see our help sheet on the subject. This will allow you to note which member was present/absent during the session and then validate the roll call. Thanks to this validation of the roll call, a member's absences will be taken into account. Step 3: No-show settings Step 3: Finally, go to Settings > Personalization: there are two parameters to be indicated concerning no-shows. - The time between validation of the roll call and final no-show status The time between validation of the roll call and final no-show status The time between validation of the roll call and final no-show status To give you time to rectify the situation, absences can be modified for a certain period of time after the roll call has been validated. When a member is indicated as absent during a roll call, choose in these parameters the time (in hours or in days) before their no-show status is definitively indicated. - The time between the validation of the roll call and the sending of the email to warn of an absence The time between the validation of the roll call and the sending of the email to warn of an absence The time between the validation of the roll call and the sending of the email to warn of an absence If a member is indicated as absent during a session, an email will automatically be sent to indicate this. The purpose of this

email is to warn members that they were absent at a session and to give them time to contact you again to modify their status if there was an error. This will allow them to avoid being marked as permanently absent (no-show) and taking a penalty. From the settings, you can define how long (in hours or days) the email will be sent after the validation of the roll call. **WARNING:** To give the member time to react, the email must be sent before the final validation of the absent status. There you have it: you have everything in place to penalize no-shows of your members using unlimited passes. All you have to do is make the roll call on your sessions! As a reminder, you can find the roll call help sheet by following this link.

Source: <https://intercom.help/bsport-helpcenter/en/articles/10963144-understanding-stripe-payouts-with-bsport-a-complete-guide>

Managing payouts efficiently is essential for businesses using Bsport and Stripe Connect. As a Bsport client, your transactions are processed through Stripe, and payouts are sent based on a structured payout schedule. This guide explains: Bsport and Stripe Connect Bsport client a structured payout schedule [YES] How payouts work How payouts work [YES] Processing times for different payment methods Processing times for different payment methods [YES] Payout schedules (daily, weekly, and monthly) Payout schedules (daily, weekly, and monthly) [YES] How refunds & disputes impact your payouts How refunds & disputes impact your payouts [YES] How to track your payouts easily How to track your payouts easily

1. How Do Stripe Payouts Work with Bsport?

1. How Do Stripe Payouts Work with Bsport? When a customer pays for a service or membership at your business, the funds do not go directly to your bank account. Instead, they go through a Stripe Connect Account, which we manage on your behalf. do not go directly to your bank account Stripe Connect Account Bsport handles all Stripe transactions and manages your payouts. Bsport handles all Stripe transactions and manages your payouts.

The Payout Process:

The Payout Process: 1 Customer makes a payment (via credit card, Apple Pay, Google Pay, SEPA, etc.). Customer makes a payment 2 Funds are first received by your Stripe Connect Account. Funds are first received by your Stripe Connect Account. 3 After processing and verification, the funds are scheduled for payout. After processing and verification 4 Stripe transfers the payout to your bank account according to your payout schedule. Stripe transfers the payout to your bank account payout schedule Important: Your customers payments are NOT instantly available in your bank account. They must first go through Stripe s processing period and payout delay (explained below). Important: NOT instantly available Stripe s processing period and payout delay

2. Payment Processing Time: SEPA vs. Credit Cards

2. Payment Processing Time: SEPA vs. Credit Cards

Credit Card Payments

Credit Card Payments [OK] Processed instantly Processed instantly [OK] Once the payment is processed, Stripe applies a payout delay for security and fraud prevention. payout delay

SEPA Direct Debit Payments

SEPA Direct Debit Payments Take at least 3 working days to be validated Take at least 3 working days Available for payout only after processing is complete, subject to the Payout Delay. only after processing is complete Example: Example: - A SEPA payment made on Monday is completed by Thursday at the earliest. A SEPA payment made on Monday is completed by Thursday at the earliest. SEPA payment made on Monday - A credit card payment made on Monday is processed instantly but available for payout only after the configured Payout Delay. A credit card payment made on Monday is processed instantly but available for payout only after the configured Payout Delay. credit card payment made on Monday available for payout only after the configured Payout Delay

3. Understanding Payout Delay (T+3 Days Minimum)

3. Understanding Payout Delay (T+3 Days Minimum) Stripe applies a payout delay for security and fraud prevention on all online transactions. This means that a payment via credit card is available at least 3

days later, the same for SEPA payments, on top of the time needed for validation (as explained above). payout delay at least 3 days later [OK] Minimum delay: 3 days (this cannot be reduced). Minimum delay: 3 days [OK] This delay ensures the payment is legitimate before being released. legitimate [OK] Even if you are on daily payouts, this delay still applies. daily payouts Even with daily payouts, you will not receive a same-day payout for transactions made that day! Even with daily payouts, you will not receive a same-day payout for transactions made that day!

4. Choosing Your Payout Frequency

4. Choosing Your Payout Frequency You can customize how often Stripe sends payouts to your bank: customize Payout Frequency Payout Frequency How It Works How It Works Best For Best For Daily Payouts Daily Payouts Funds that complete the payout delay are sent every day High-volume businesses Weekly Payouts Weekly Payouts Payouts are collected from a Thursday morning until the following Wednesday night. They are then sent every Friday; funds arrive Monday every Friday Monday Most businesses Monthly Payouts Monthly Payouts You choose a specific day each month specific day Long-term cash flow planning Weekly payouts are the most common because they balance cash flow and processing time. Weekly payouts are the most common because they balance cash flow and processing time.

5. What Transactions Are Included in Your Payout?

5. What Transactions Are Included in Your Payout? A payout only includes transactions that have cleared Stripe's processing time. only includes transactions that have cleared Stripe's processing time

Weekly Payouts - Example Breakdown

Weekly Payouts - Example Breakdown If your payout is scheduled for Monday, it will include: scheduled for Monday - Transactions made Thursday (last week) - Wednesday (this week) Transactions made Thursday (last week) - Wednesday (this week) Thursday (last week) - Wednesday (this week) - Payout is sent Friday, arrives Monday Payout is sent Friday, arrives Monday sent Friday, arrives Monday Transaction Date Transaction Date Included in Payout? Included in Payout? Thursday (last week) [YES] Yes Monday (this week) [YES] Yes Friday (this week) [NO] No (Will be in next week's payout)

6. Refunds & Disputes: How They Impact Payouts

6. Refunds & Disputes: How They Impact Payouts [OK] Refunds are deducted from your next payout automatically. Refunds are deducted from your next payout [OK] Disputes (chargebacks) are also deducted if lost. Disputes (chargebacks) are also deducted [OK] If your balance becomes negative, Stripe will block future refunds until positive. If your balance becomes negative block future refunds

Example: Refund Deduction

Example: Refund Deduction - Expected Payout: 1,000EUR Expected Payout: 1,000EUR Expected Payout: 1,000EUR - Refund Issued: 300EUR Refund Issued: 300EUR Refund Issued: 300EUR - Final Payout: 700EUR Final Payout: 700EUR Final Payout: 700EUR If your balance is negative, Stripe may withhold future payouts or require additional funds to cover the deficit. If your balance is negative, Stripe may withhold future payouts or require additional funds to cover the deficit.

[DATA] 7. Tracking Your Payouts in the Bsport Dashboard

[DATA] 7. Tracking Your Payouts in the Bsport Dashboard You can check what payments are included in a payout directly from your Bsport Back Office. what payments are included in a payout

How to Check Payout Details

How to Check Payout Details 1 Go to Settings -> Bsport Subscription. Go to Settings -> Bsport Subscription 2 Find the list of payouts at the top. list of payouts 3 Copy the reference number under the payout amount. reference number 4 Go to Reporting -> Payment. Frequently Asked Questions (FAQ)

Source: <https://intercom.help/bsport-helpcenter/en/articles/12441759-new-vat-rules-for-eu-clients-starting-october-2025>

From October 2025, Bsport will apply new VAT rules to some of our EU clients. This change is required by law and applies to all companies and associations using Bsport in the European Union (outside France) who do not have a valid intra-community VAT number registered in their back-office. October 2025 who do not have a valid intra-community VAT number

Why is this changing?

Why is this changing? Bsport provides software-as-a-service (SaaS), which the European Union classifies as an electronically supplied service (our software platform). According to EU law, electronic services must be taxed differently depending on whether the client provides a valid intra-community VAT number (often called an EU VAT number or VIES). EU VAT number VIES - If you have a valid intra-community VAT number (EU VAT) -> no VAT is applied to your invoice. You are considered a taxable business. Bsport will issue your invoices without VAT, and you will declare the VAT yourself in your own country (this is called the reverse-charge mechanism). If you have a valid intra-community VAT number (EU VAT) -> no VAT is applied to your invoice. You are considered a taxable business. Bsport will issue your invoices without VAT, and you will declare the VAT yourself in your own country (this is called the reverse-charge mechanism). intra-community VAT number (EU VAT) - If you do not have a valid intra-community VAT number -> You are considered a non-taxable person (like a consumer). In this case, Bsport is required to add VAT to your invoices at your country s local rate (e.g. Germany 19%, Spain 21%, Italy 22%). If you do not have a valid intra-community VAT number -> You are considered a non-taxable person (like a consumer). In this case, Bsport is required to add VAT to your invoices at your country s local rate (e.g. Germany 19%, Spain 21%, Italy 22%). not This is not a new rule: it comes directly from the EU VAT Directive (2006/112/EC, Article 58) and the VAT e-commerce package that entered into force on 1 July 2021. EU VAT Directive (2006/112/EC, Article 58) From October 2025, Bsport will fully apply these rules in all cases. This is not a decision made by Bsport, but a legal requirement for all software providers in the EU. October 2025 legal requirement for all software providers in the EU VAT vs. EU VAT: What s the difference? VAT vs. EU VAT: What s the difference? - VAT (Value Added Tax): A consumption tax applied in every EU country (e.g. Germany 19%, Spain 21%, Italy 22%). VAT (Value Added Tax): A consumption tax applied in every EU country (e.g. Germany 19%, Spain 21%, Italy 22%). VAT (Value Added Tax): - EU VAT / Intra-community VAT number: A special tax identification number that exempts businesses (and some associations) from VAT when purchasing services across EU borders. EU VAT / Intra-community VAT number: A special tax identification number that exempts businesses (and some associations) from VAT when purchasing services across EU borders. EU VAT / Intra-community VAT number: tax identification number Simply put: Having a VAT number from your national tax authority registered in the EU VIES system allows you to avoid VAT charges on Bsport invoices. VAT number from your national tax authority registered in the EU VIES system https://ec.europa.eu/taxation_customs/vies/#/vat-validation

What does this mean for you?

What does this mean for you? - EU companies without an EU VAT number -> VAT will be charged at your local rate. EU companies without an EU VAT number -> VAT will be charged at your local rate. EU companies without an EU VAT number - EU companies with a valid EU VAT number -> No VAT will be charged. EU companies with a valid EU VAT number -> No VAT will be charged. EU companies with a valid EU VAT number - EU Associations: If the association has an EU VAT number -> No VAT will be charged. If the association does not have an EU VAT number -> VAT must be charged, as the association is

considered an end consumer . EU Associations: EU Associations: - If the association has an EU VAT number -> No VAT will be charged. If the association has an EU VAT number -> No VAT will be charged. - If the association does not have an EU VAT number -> VAT must be charged, as the association is considered an end consumer . If the association does not have an EU VAT number -> VAT must be charged, as the association is considered an end consumer . not

In which cases VAT will not be charged

In which cases VAT will not be charged - EU clients without EU VAT: VAT will be charged at the local rate. EU clients without EU VAT: VAT will be charged at the local rate. EU clients without EU VAT - Associations with no VAT number: VAT will be charged. Associations with no VAT number: VAT will be charged. Associations with no VAT number - Non-EU clients (UK, Switzerland, USA, Canada, etc.): No VAT will be charged, as they are outside EU VAT rules. Non-EU clients (UK, Switzerland, USA, Canada, etc.): No VAT will be charged, as they are outside EU VAT rules. Non-EU clients

Will this cost me more?

Will this cost me more? - For businesses and VAT-registered associations: No. VAT is not a cost; it can be reclaimed via your local tax return. For businesses and VAT-registered associations: No. VAT is not a cost; it can be reclaimed via your local tax return. For businesses and VAT-registered associations - For associations and entities not registered for VAT: Yes, VAT is a cost, since only VAT-registered entities can recover it. For associations and entities not registered for VAT: Yes, VAT is a cost, since only VAT-registered entities can recover it. For associations and entities not registered for VAT

What should you do now?

What should you do now? - Log in to your back-office. Log in to your back-office. back-office - Go to Settings > Company > VAT identification number. Go to Settings > Company > VAT identification number. Settings > Company > VAT identification number - Enter your valid intra-community VAT number. Enter your valid intra-community VAT number. October 2025 - Associations are treated the same as companies: no VAT only if they have an EU VAT number.

Associations are treated the same as companies: no VAT only if they have an EU VAT number. Associations are treated the same as companies - Non-EU clients will not be charged VAT. Non-EU clients will not be charged VAT. Non-EU clients - Businesses and VAT-registered associations can reclaim VAT, so it's not a real cost. Businesses and VAT-registered associations can reclaim VAT, so it's not a real cost. reclaim VAT - Associations or entities not VAT-registered will bear the VAT. Associations or entities not VAT-registered will bear the VAT. If you're unsure about your VAT status, please consult your accountant or local tax authority. The Bsport Team The Bsport Team

Frequently Asked Questions (FAQ)

Frequently Asked Questions (FAQ) 1. What if I get my VAT number after October 2025? 1. What if I get my VAT number after October 2025? If you enter a valid EU VAT number after October, VAT will stop being applied to future invoices. For past invoices, you can reclaim VAT through your local tax return with your accountant. 2. I already entered my VAT number, how do I know if it's valid? 2. I already entered my VAT number, how do I know if it's valid? Your VAT number must be valid in the EU VIES system. If it's invalid, VAT will still be charged. You can check validity here: VIES EU Validation Tool. 3. I am outside the EU, do I need to do anything? 3. I am outside the EU, do I need to do anything? No. Clients outside the EU (e.g. UK, Switzerland, USA) are not charged VAT. 4. I am a French association with VAT exemption, do I pay VAT? 4. I am a French association with VAT exemption, do I pay VAT? If you are exempt, you must send us an attestation de non-assujettissement. Without this, French VAT will apply. 5. Can I recover VAT charged on Bsport invoices? 5. Can I recover VAT charged on Bsport invoices? Yes, if you are VAT-registered. Your accountant will reclaim it through your VAT return. Associations or non-VAT-registered entities cannot recover VAT. 6. How long does it take to get an EU VAT number? 6. How long does it take to get an EU VAT number? The process depends on your country, but typically takes 3-8 weeks depending on the country. We recommend applying as soon as possible.

What is VeriFactu?

Source: <https://intercom.help/bsport-helpcenter/en/articles/13375112-how-to-activate-verifactu-on-your-platform>

What is VeriFactu?

VeriFactu is the electronic invoicing system introduced by the Spanish Tax Agency to ensure traceability, transparency, and authenticity in business transactions. Its main goal is to guarantee that all issued invoices are recorded and reported to the Tax Agency in real or near real time, helping to prevent tax fraud and simplify compliance for businesses. In this guide, we'll explain how to activate the integration with VeriFactu through Fiskaly, our fiscal partner that allows you to connect your invoicing system to the Spanish Tax Agency easily, automatically, and securely. The integration has to be activated, please reach out to your Account Manager to activate it. For now, TicketBai is not supported (Basque Country).

Introduction

In order to be able to sign your invoices you must complete all the following steps and prerequisites. Invoices created before completing these steps won't be sent automatically. You'll have to do it manually.

1. Spanish Electronic Certificate

The first step of this integration is to obtain your Spanish Electronic Certification. To do so, please follow the steps indicated here Please note: - Cost: 24EUR (without taxes) Cost: 24EUR (without taxes) 24EUR - Can be completed: Fully online (requires installing specific software), or In person at an AEAT office: <https://sede.agenciatributaria.gob.es/> Can be completed: - Fully online (requires installing specific software), or Fully online (requires installing specific software), or - In person at an AEAT office:

<https://sede.agenciatributaria.gob.es/> In person at an AEAT office: <https://sede.agenciatributaria.gob.es/>
AEAT - Estimated timing: Online: a few hours In-person appointment: usually within ~1 week
Estimated timing: - Online: a few hours Online: a few hours - In-person appointment: usually within ~1 week
In-person appointment: usually within ~1 week ~1 week - Validity Your certificate will be valid for 2 years
Validity - Your certificate will be valid for 2 years Your certificate will be valid for 2 years 2 years

Why is this required?

To allow Fiskaly to submit invoices to Verifactu on behalf of your company, a Social Collaboration Agreement must be signed between you and Fiskaly. Fiskaly Verifactu Social Collaboration Agreement This agreement can only be signed using the Spanish Electronic Certificate of the company representative. can only be signed using the Spanish Electronic Certificate of the company representative

2. Set up the integration

To set up the integration, go to Settings> Billing > Veri Factu. If you see the following screen, it means the integration has not been activated, you must reach out to your Account Manager to ask for activation. integration has not been activated, reach out to your Account Manager Once the integration activated you should see the following screen:

2.1 Set up your bsport account

First make sure you've correctly set up your Stripe information and indicated your VAT number. Stripe information VAT number. Please go to Settings>Company.

2.2 Activate sequential numbering

If not already done during your onboarding, you'll have to activate invoice sequential numbering. To do so, please follow this helpsheet. Important to note: Important to note: - if your sequential numbering starts today, the system will still block you, considering sequential numbering was not activated. You'll have to wait for the next day to continue the process. if your sequential numbering starts today, the system will still block you, considering sequential numbering was not activated. You'll have to wait for the next day to continue the process. - if your sequential numbering starts next month, the system will block you until next month has we need sequential numbering to be up and running. if your sequential numbering starts next month, the system will block you until next month has we need sequential numbering to be up and running.

2.3 Provide Studio Representative Details

The following information must be provided and must exactly match the data associated with the electronic certificate: must exactly match - Full name Full name - DNI / NIE DNI / NIE - Address line Address line - Municipality Municipality - Country Country Reminder: the following information must exactly match the data associated with the electronic certificate. Reminder:

2.4 Social Collaboration Agreement

Once everything is completed, click on Create Agreement. The system will load and you should have the following page: - Click on Download PDF Click on Download PDF - Sign the PDF with your Spanish electronic certificate See how to do it following this article Sign the PDF with your Spanish electronic certificate - See how to do it following this article See how to do it following this article - Upload the signed document with Upload PDF Upload the signed document with Upload PDF Let the system load, once the document has been approved you should see the following screen: You are now all set! VeriFactu has been correctly set up and activated on you account. To note: You can always change the details of representative or generate a new agreement by clicking on the Edit button and start again the previous flow. To note:

3. Invoice Eligibility for Verifactu

An invoice can be sent to Verifactu if and only if all of the following conditions are met: if and only if - The invoice is opened or a refund invoice Meaning the invoice has a PDF For example, subscriptions have draft invoices (for future ones), these are not opened invoices It doesn't mean the invoice has been paid The invoice is opened or a refund invoice opened or a refund - Meaning the invoice has a PDF For example, subscriptions have draft invoices (for future ones), these are not opened invoices Meaning the invoice has a PDF - For example, subscriptions have draft invoices (for future ones), these are not opened invoices For example, subscriptions have draft invoices (for future ones), these are not opened invoices - It doesn't mean the invoice has been paid It doesn't mean the invoice has been paid - The invoice is not voided The invoice is not voided not voided - The invoice does not come from a migration The invoice does not come from a migration not come from a migration - The invoice contains at least one invoice item The invoice contains at least one invoice item at least one invoice item - The invoice is not a partial refund from a payment pack The invoice is not a partial refund from a payment pack not If any of these conditions are not met, the invoice will not be sent to Verifactu.

4. Invoice Signature Flows

In order to send an invoice to tax authorities we first make sure that the invoice has the right information. Invoices with wrong information will be rejected by tax authorities and it won't be possible to send them again. This is why we do a first check before sending the invoices. rejected by tax authorities won't be possible to send them again Reminder: all invoices generated before the full integration set up are not sent to the Spanish Tax Agency. Reminder: Once onboarding is complete, eligible invoices are automatically sent to Verifactu upon finalization. eligible invoices are automatically sent to Verifactu upon finalization Sending an invoice can: - Succeed, or Succeed, or Succeed - Fail (before Verifactu processes it) Fail (before Verifactu processes it) Fail This status reflects the ability to send the invoice, not its final registration result.

5. Failed Invoice Sending

For invoices 400EUR (tax included), Verifactu requires information about the invoice recipient (the member). For invoices 400EUR (tax included) Missing information about the recipient is the most common source of errors. Here is the information needed: - Recipient country Recipient country - City City - Zip code Zip code - If Spanish recipient: NIF If Spanish recipient: NIF NIF - If non-Spanish recipient: official identification document If non-Spanish recipient: official identification document official identification document When information is missing: - The invoice cannot be sent The invoice cannot be sent - You must complete the missing information You must complete the missing information - They go back to the invoice and click Try Again to retry submission They go back to the invoice and click Try Again to retry submission Try Again WARNING: Important: If the retry succeeds but incorrect data is provided, the invoice may be rejected by Verifactu and cannot be sent again. Important: rejected by Verifactu cannot be sent again

6. Successful Invoice Sending

Once an invoice is successfully sent, it can be in one of the following states:

6.1 Pending

- Verifactu processing may take up to 3 minutes Verifactu processing may take up to 3 minutes 3 minutes
- Status updates automatically after refresh Status updates automatically after refresh

6.2 Registered

- The invoice has been correctly registered with Spanish tax authorities The invoice has been correctly registered with Spanish tax authorities

6.3 Rejected

The invoice was not accepted by Verifactu. Common reasons Common reasons - Invalid tax rate Invalid tax rate - Invalid Spanish NIF (for invoices 400EUR) Invalid Spanish NIF (for invoices 400EUR) In this case it is not possible to send the invoice again. You should correct the missing information, cancel/refund said invoice and create a new one. not possible to send the invoice again.

In call cases

In all three cases: - A QR code and Verifactu URL are added to the invoice PDF A QR code and Verifactu URL are added to the invoice PDF QR code Verifactu URL - This ensures traceability and compliance This ensures traceability and compliance

7. Invoices Finalized Before Onboarding Completion

Invoices finalized before Verifactu onboarding are not automatically sent. You can manually send eligible invoices from the invoice details page. before Verifactu onboarding not automatically sent - Each invoice must be sent individually Each invoice must be sent individually - Automatic batch sending is not available Automatic batch sending is not available

8. Reverse (Refund) Invoices

Reverse invoices follow the exact same Verifactu flows as regular invoices. A reverse invoice can only be sent to Verifactu if: the exact same Verifactu flows - The source invoice was itself sent to Verifactu (even if it was rejected) The source invoice was itself sent to Verifactu (even if it was rejected) source invoice If the source invoice was never sent: - The reverse invoice can still be manually sent from the invoice details page The reverse invoice can still be manually sent from the invoice details page manually sent

Source: <https://intercom.help/bsport-helpcenter/en/articles/11426418-tse-integration-with-fiskaly>

To comply with German law, all cash register systems must be connected to a TSE (technical security system). The goal is to prevent any manipulation of sales data after it has been recorded. TSE (technical security system) At bsport, we've integrated with fiskaly, the first company certified by the German Federal Cyber Security Authority with maximum validity for a cloud-based TSE solution. fiskaly handles the secure, tamper-proof signing of your transactions, keeping your studio compliant with KassenSichV. fiskaly This guide walks you through everything you need to know as a studio manager.

1. Activating fiskaly in the Backoffice

Activating fiskaly in the Backoffice Enabling fiskaly is quick and easy: - Log into your bsport Backoffice Log into your bsport Backoffice - Navigate to Settings > bsport subscription > Available Add-ons Navigate to Settings > bsport subscription > Available Add-ons Settings > bsport subscription > Available Add-ons - Locate the fiskaly TSE integration upsell Locate the fiskaly TSE integration upsell fiskaly TSE integration - Click See more, tick the confirmation checkbox, and click Confirm Click See more, tick the confirmation checkbox, and click Confirm See more, Confirm Your TSE environment will be automatically created. No technical setup is needed: you can start using your compliant register immediately. Note: The TSE integration is a paid add-on to cover the cost of our certified third-party provider, fiskaly. paid add-on

2. What happens when you create an invoice?

What happens when you create an invoice? When an invoice is generated on bsport: - A transaction is initiated in the fiskaly system A transaction is initiated in the fiskaly system - There is no visible change at this stage There is no visible change at this stage Think of it as starting the legal record, but not finalising it yet.

3. What happens when the invoice is paid?

What happens when the invoice is paid? When the customer pays: - fiskaly signs the transaction: it can no longer be altered fiskaly signs the transaction: it can no longer be altered signs the transaction: it can no longer be altered - A QR code appears on the PDF receipt A QR code appears on the PDF receipt QR code - A chip displays on the invoice page in your Backoffice A chip displays on the invoice page in your Backoffice chip This confirms that the record of the transaction is now tamper-proof. Your member's online purchases are also signed by fiskaly. In this case, invoice creation and payment occur instantly.

4. Where to find your legal information

Where to find your legal information All relevant legal and fiscal information is available directly in your Backoffice: - Go to Settings > Billing Go to Settings > Billing Settings > Billing - Scroll to Kassensicherungsverordnung (Germany) Scroll to Kassensicherungsverordnung (Germany) Kassensicherungsverordnung (Germany) Here, you'll find: - An overview of the fiskaly integration An overview of the fiskaly integration - TSE version and manufacturer details TSE version and manufacturer details - A link to fiskaly's certification documents A link to fiskaly's certification documents fiskaly's certification documents - A link to bsport s Procedural Documentation A link to bsport s Procedural Documentation bsport s Procedural Documentation

5. In case of an audit

In case of an audit If you're audited by German tax authorities: - Contact your Account Manager to export your fiskaly-signed data Contact your Account Manager to export your fiskaly-signed data - Provide your auditor with bsport s Procedural Documentation Provide your auditor with bsport s Procedural

Documentation bsport s Procedural Documentation All transactions are securely stored in fiskaly s system and can be retrieved at any time.

Frequently Asked Questions

Do I need a TSE?-> Yes, if you use the bsport Backoffice to process on-site payments. Do I need a TSE? -> Only a tax advisor can confirm if exceptions apply to your case. Will previous transactions be signed by fiskaly?-> No. Only transactions created and paid after the TSE was activated are signed. Will previous transactions be signed by fiskaly? created and paid

Source: <https://intercom.help/bsport-helpcenter/en/articles/13529640-how-to-set-up-sequential-invoice-numbering>

In some countries, invoices must follow a sequential numbering system to ensure proper accounting and prevent fraud. If you re already using bsport and haven t set this up yet, this article explains how and when to activate sequential invoice numbering for your studio. how and when to activate sequential invoice numbering If you already filled in your invoice numbering during onboarding, you don t need to do anything. If you already filled in your invoice numbering during onboarding, you don t need to do anything.

What is sequential invoice numbering?

Sequential invoice numbering means that each new invoice gets a number that follows the previous one, without gaps or duplicates. On bsport, an invoice number can include: - A prefix (optional) A prefix (optional) prefix - A date (year, or year + month – mandatory) A date (year, or year + month – mandatory) date - A sequential number A sequential number sequential number - A suffix (optional) A suffix (optional) suffix Example: INV-2026-000004-FR WARNING: Important note: Once this numbering is set up, it cannot be edited. Important note: it cannot be edited

Who needs to set this up?

You need to take action if: - Your studio was created before this feature existed, and Your studio was created before this feature existed, and before this feature existed - You haven t defined your invoice numbering yet. You haven t defined your invoice numbering yet. If your studio is new and you already completed this step during onboarding, you re all set [YES] If you already asked for sequential numbering to be done by bsport in the past, you will not be able to change the numbering from the back office.

Where to set up invoice numbering

- Go to Settings > Billing in your bsport back office Go to Settings > Billing in your bsport back office Settings > Billing
- Go to the Invoice numbering section Go to the Invoice numbering section Invoice numbering
- Define your numbering format (prefix, date, suffix) Define your numbering format (prefix, date, suffix) Once confirmed, this configuration is locked and will apply automatically based on the start date you choose. configuration is locked

Choose when sequential numbering should start

You ll be asked to select when sequential numbering should apply. when **WARNING: Important note:** Once this numbering is set up, it cannot be edited. Important note: it cannot be edited

Option 1: Beginning of next month (recommended)

This option is ideal if you don t use external accounting software. don t use external accounting software - All invoices created before next month keep their current ID All invoices created before next month keep their current ID before next month - Invoices created from next month onward will use sequential numbering Invoices created from next month onward will use sequential numbering from next month onward - The numbering will start at 1 The numbering will start at 1

Option 2: Beginning of current month

This option is mainly for studios that already use external accounting software. already use external accounting software - Sequential numbering is applied retroactively to invoices created since the start of the current month Sequential numbering is applied retroactively to invoices created since the start of the current month - In the interface, existing invoices will display the new sequential number In the interface, existing invoices will display the new sequential number - Invoice PDFs created in the past will still show their original ID (PDFs cannot be edited) Invoice PDFs created in the past will still show their original ID (PDFs cannot be edited) Invoice PDFs created in the past will still show their original ID All new invoices will have the correct sequential number both in the interface and on the PDF.

Using an external accounting software?

If you recreate bsport invoices in another accounting tool, you can make sure both systems stay aligned. - First select “Beginning of current month” as start date First select “Beginning of current month” as start date - Then, enable the option I use an external accounting provider Then, enable the option I use an external accounting provider I use an external accounting provider - Choose the starting number for bsport invoices Choose the starting number for bsport invoices starting number We recommend: - Checking the last invoice number used in your external software Checking the last invoice number used in your external software last invoice number - Adding +1 Adding +1 - Using that number as the starting point on bsport Using that number as the starting point on bsport This ensures continuity between both systems.

WARNING: Important to know WARNING:

- Once invoice numbering is set, it cannot be changed Once invoice numbering is set, it cannot be changed it cannot be changed
- Invoices created before activation keep their original ID Invoices created before activation keep their original ID
- Sequential numbering applies only to invoices created on bsport Sequential numbering applies only to invoices created on bsport

All set!

Once your settings are done, you should see the following screen:

Prerequisites

Source: <https://intercom.help/bsport-helpcenter/en/articles/14138282-understand-invoice-payment-statuses>

Prerequisites

- Access to the invoice details page in Billing > Invoices Access to the invoice details page in Billing > Invoices
- An existing invoice An existing invoice

Detailed explanation

On the invoice details page, several payment amounts are displayed. Each one reflects a different stage of the payment process.

1. Total due

- This is the total amount of the invoice. This is the total amount of the invoice.
- It corresponds to the full price that must be paid. It corresponds to the full price that must be paid.

2. Payment received

- This is the total amount already paid successfully. This is the total amount already paid successfully.
- These payments are confirmed and cannot fail. These payments are confirmed and cannot fail.

3. Payment planned

- This is the total of future scheduled payments. This is the total of future scheduled payments.
- These payments have not yet been attempted (e.g. instalments). These payments have not yet been attempted (e.g. instalments).

4. Payment pending

This includes payments currently being processed. For example: - SEPA direct debit SEPA direct debit - BACS payments BACS payments WARNING: These payments can still fail.

5. Payment outstanding

This is the remaining amount to be paid. It is calculated as: $\text{Total due} - (\text{Payment received} + \text{Payment planned} + \text{Payment pending})$ $\text{Total due} - (\text{Payment received} + \text{Payment planned} + \text{Payment pending})$ If this amount is greater than 0, the invoice is not fully covered.

Example

For a 100EUR invoice: - Initially: No payments -> 100EUR outstanding Initially: - No payments -> 100EUR outstanding No payments -> 100EUR outstanding 100EUR outstanding - After setting up 10 instalments of 10EUR: 100EUR planned -> 0EUR outstanding After setting up 10 instalments of 10EUR: - 100EUR planned -> 0EUR outstanding 100EUR planned -> 0EUR outstanding 0EUR outstanding - If one payment is processing: 80EUR planned + 20EUR pending -> still 0EUR outstanding If one payment is processing: - 80EUR planned + 20EUR pending -> still 0EUR outstanding 80EUR planned + 20EUR pending -> still 0EUR outstanding 0EUR outstanding - If one payment succeeds: 20EUR received + 80EUR planned -> still 0EUR outstanding If one payment succeeds: - 20EUR received + 80EUR planned -> still 0EUR outstanding 20EUR received + 80EUR planned -> still 0EUR outstanding 0EUR outstanding - If one payment fails: 20EUR received + 70EUR planned -> 10EUR outstanding If one payment fails: - 20EUR received + 70EUR planned -> 10EUR outstanding 20EUR received + 70EUR planned -> 10EUR outstanding 10EUR outstanding

Additional information

WARNING: ImportantIf Payment outstanding > 0, the invoice is overdue. An action is required (manual payment or retry). Important Payment outstanding > 0 Good to knowA failed planned payment creates the same situation as a canceled one, with the failed attempt visible in the payment list. Good to know

Steps to export invoices

How to Manage Payments, Unpaid Balances, and Payment Methods Effectively

Source: <https://intercom.help/bsport-helpcenter/en/articles/14532803-how-to-manage-payments-unpaid-balances-and-payment-methods-effectively>

How to Manage Payments, Unpaid Balances, and Payment Methods Effectively

Managing payments, unpaid balances, and customer payment methods is essential for ensuring smooth financial operations. This guide provides an overview of key processes and actionable steps to handle common payment-related scenarios.

Overview of Payment Management

Payment management involves tracking unpaid balances, processing invoices, and managing customer payment methods. By understanding these processes, you can ensure timely payments and maintain accurate financial records.

Handling Unpaid Balances and Invoices

Collecting Payments for Unpaid Balances

If no payment data is entered for a customer account, the internal account balance will show as negative. This situation typically arises when payment was not successfully collected or recorded, indicating that the client has not paid or the payment has not been processed. To see a list of members with unpaid balances: Option 1: To see a list of members with unpaid balances: Option 1: - Go to Marketing > Smartlists > Create a smartlist. Go to Marketing > Smartlists > Create a smartlist. - Create a new smartlist Create a new smartlist - Select Add Parameters > Member information > Account balance. Select Add Parameters > Member information > Account balance. - Select the option less than or equal to -1 and then add Select the option less than or equal to -1 and then add less than or equal to -1 add - You can then see at the bottom of the page under Overview a list of members who are in a minus account balance and/or have an unpaid invoice.

You can then see at the bottom of the page under Overview a list of members who are in a minus account balance and/or have an unpaid invoice. Option 2: This is just to see unpaid invoices and not members who are in a minus balance. Option 2: - Go to Analytics > Reports Go to Analytics > Reports - Select Unpaid Invoices Select Unpaid Invoices 3. Generate the report. You will then have a list of all unpaid invoices.

Managing Payment Methods and Charging Unpaid Invoices

- You can add a payment method to a member's profile if they do not currently have one. To do this, go to the member profile and scroll down on the left side and you will see the option to add a payment method. You can add a payment method to a member's profile if they do not currently have one. To do this, go to the member profile and scroll down on the left side and you will see the option to add a payment method.
- If there is already a saved payment method and the member is in a minus account balance, this could be due to an unpaid subscription. First you can charge the account balance with the payment method now on file by clicking Adjust Balance. Then click Next. You can then charge the payment method that is on file. If the minus balance is due to an unpaid subscription, make sure to go to Billing on the member profile and select the subscription at the bottom. On their subscription on the right side you will have the option to "add" the payment method. This will in turn give you the option to select the payment method that the member now has on file. If there is already a saved payment method and the member is in a minus account balance, this could be due to an unpaid subscription. First you can charge the account balance with the payment method now on file by clicking Adjust Balance. Then click Next. You can then charge the payment method that is on file. This will give you the option to charge the member through the =ir saved payment method.

Resolving Common Payment Issues

- Always ensure that payment methods are up-to-date to avoid delays in processing payments. Always ensure that payment methods are up-to-date to avoid delays in processing payments.
- Regularly monitor unpaid balances and invoices to maintain accurate financial records. Regularly monitor unpaid balances and invoices to maintain accurate financial records.
- Use automated tools and reports to track and manage outstanding payments efficiently. Use automated tools and reports to track and manage outstanding payments efficiently. By following these guidelines, you can effectively manage payments, unpaid balances, and customer payment methods, ensuring a seamless experience for both your business and your customers.

How to Manage and Disable SEPA Payments in bsport

Source: <https://intercom.help/bsport-helpcenter/en/articles/14535515-how-to-manage-and-disable-sepa-payments-in-bsport>

How to Manage and Disable SEPA Payments in bsport

SEPA (Single Euro Payments Area) payments are a common method for processing transactions in bsport. This guide explains how to manage and disable SEPA payments, whether for new transactions or existing subscriptions, and clarifies the implications of disabling SEPA.

Overview of SEPA Payments

SEPA payments allow for efficient and standardised euro transactions across participating countries. In bsport, SEPA can be used for both one-time payments and recurring subscriptions. However, there may be scenarios where you need to disable SEPA as a payment method or stop automatic SEPA payments for specific subscriptions.

Disabling SEPA as a Payment Method

To prevent SEPA from being used for future transactions, such as trial sessions or new subscriptions, follow these steps:

- Navigate to Settings > Payment Methods in the Bsport dashboard. Navigate to Settings > Payment Methods in the Bsport dashboard. Settings > Payment Methods - Locate the SEPA payment option. Locate the SEPA payment option.
- Turn off or uncheck the SEPA payment method to disable it for future use. Turn off or uncheck the SEPA payment method to disable it for future use. This action ensures that SEPA will no longer be available as a payment option for members making new purchases via the Member portal or app. However, staff can still process SEPA payments manually from the Back Office if needed.

Managing SEPA for Existing Subscriptions

If you need to stop automatic SEPA direct debit payments for an existing subscription, follow these steps:

- Open the bsport dashboard and go to Transactions > Direct Debits. Open the bsport dashboard and go to Transactions > Direct Debits. Transactions > Direct Debits - In the list of active subscriptions, locate the relevant invoice and click the pencil icon to edit it. In the list of active subscriptions, locate the relevant invoice and click the pencil icon to edit it.
- Select View Invoice to access the payment details. Select View Invoice to access the payment details. View Invoice - In the Payment Scheduled section, click the three dots next to the customer's instalment. In the Payment Scheduled section, click the three dots next to the customer's instalment. Payment Scheduled - Choose Deactivate to cancel the automatic SEPA payment. Once unscheduled, the invoice will need to be collected manually. This process ensures that no further automatic SEPA payments are processed for the subscription. Choose Deactivate to cancel the automatic SEPA payment. Deactivate Once unscheduled, the invoice will need to be collected manually. This process ensures that no further automatic SEPA payments are processed for the subscription.

Implications of Disabling SEPA

Disabling SEPA as a payment method has the following implications:

- New Transactions: Members will no longer see SEPA as an available payment option for online purchases via the Member portal or app. New Transactions: Members will no longer see SEPA as an available payment option for online purchases via the Member portal or app.
- Existing Mandates: Disabling SEPA does not automatically cancel existing SEPA payments or mandates. These will continue unless manually updated. Existing Mandates: Disabling SEPA does not automatically cancel existing SEPA payments or mandates. These will continue unless manually updated.
- Back Office Transactions: Staff can still process SEPA payments manually from the Back Office, even if SEPA is disabled for members. Back Office Transactions: Staff can still process SEPA payments manually from the Back Office, even if SEPA is disabled for members.
- Customer Payment Methods: If you want to prevent future SEPA transactions for specific customers, you must manually update their payment methods. Customer Payment Methods: If you want to prevent future SEPA transactions for specific customers, you must manually update their payment methods. Customer Payment Methods: By understanding and managing SEPA payments effectively, you can ensure smooth payment operations while addressing specific business needs.

AI assistant

Source: <https://intercom.help/bsport-helpcenter/en/articles/11516652-coachmail-your-guide-to-building-more-advanced-emails>

Once you have mastered the first steps of creating an email, as explained in this article, you can move on to using the more advanced features of the bsport email builder. The builder now includes a set of powerful tools designed to help you create high-performing, visually engaging, and time-efficient marketing emails. This guide will walk you through each of these features, with concrete examples and use cases to help you get the most out of the builder. Below is what the updated interface looks like: Blocks that include AI capabilities are marked with this green icon: In this document we will cover the following features and how to use them efficiently: - AI assistant (text, buttons, headers) AI assistant (text, buttons, headers) - Countdown timer Countdown timer - Company-saved content blocks Company-saved content blocks - Image gallery Image gallery - Saved uploads Saved uploads

AI assistant

AI for text

What is AI for text?

This feature leverages AI to assist with text creation and editing inside your email. Whether you need to correct grammar, rephrase for a different tone, expand ideas, or shorten your message, the Smart Text assistant can help.

How to use it?

- Write your draft or ideas directly in the text box. Write your draft or ideas directly in the text box.
- Click on the AI assistant to choose what you want help with: correcting tone, making it shorter, adding more detail, etc. Click on the AI assistant to choose what you want help with: correcting tone, making it shorter, adding more detail, etc.

Use cases & benefits?

- Create professional, polished messages faster. Create professional, polished messages faster.
- Adapt tone based on your audience: friendly, formal. Adapt tone based on your audience: friendly, formal.
- Example: You want to write a short promotion for a new class. Instead of writing it from scratch, write: “Promote our new yoga class”, and ask the AI to expand text or rephrase it. Then change the tone to formal. Example: You want to write a short promotion for a new class. Instead of writing it from scratch, write: “Promote our new yoga class”, and ask the AI to expand text or rephrase it. Then change the tone to formal.

AI for headers & buttons

What is AI for headers & buttons?

This tool suggests high-impact headlines and button CTAs (calls to action), optimized for clarity and click-through rate.

How to use it?

How to use it? - Input the goal of your email or the email section (e.g., Promote Pilates class or Drive booking for workshop), and the AI will provide options you can insert directly. Input the goal of your email or the email section (e.g., Promote Pilates class or Drive booking for workshop), and the AI will provide options you can insert directly.

Use cases & benefits

Use cases & benefits - Improve subject lines and CTAs to drive more engagement. Improve subject lines and CTAs to drive more engagement. - Example: Instead of writing Join us now, let the AI suggest Book your spot - only 5 left! or Start your Pilates journey today. Example: Instead of writing Join us now, let the AI suggest Book your spot - only 5 left! or Start your Pilates journey today.

AI for images

What is AI for images?

This feature allows you to generate AI images directly inside the builder by writing a descriptive prompt and selecting a style.

How to use it?

How to use it? - Type a prompt (e.g., sunrise yoga on a beach) and pick a style like realistic, flat illustration, or vintage. Type a prompt (e.g., sunrise yoga on a beach) and pick a style like realistic, flat illustration, or vintage. - Upload the generated image into your email. Upload the generated image into your email.

Use cases & benefits

Use cases & benefits - Easily create visuals that match the theme of your campaign. Easily create visuals that match the theme of your campaign. - Example: Launching a summer promo? Use a prompt like happy group doing fitness outdoors summer sun to instantly generate on-brand visuals. Example: Launching a summer promo? Use a prompt like happy group doing fitness outdoors summer sun to instantly generate on-brand visuals. Tip: Whenever possible, use authentic photos of your studio or clients for better trust and relevance.

Countdown Timer

What is the countdown timer?

A live countdown timer that visually displays the time left before a specific deadline.

How to use it?

How to use it? - Set a specific end date/time in the timer block. Set a specific end date/time in the timer block. - Add it to your email wherever urgency is needed. Add it to your email wherever urgency is needed.

Use Cases & Benefits

Use Cases & Benefits - Create urgency for limited-time offers, flash sales, or special events. Create urgency for limited-time offers, flash sales, or special events. - Example: Add a timer to a campaign titled Last 48 hours to get 20% off your first class. Example: Add a timer to a campaign titled Last 48 hours to get 20% off your first class.

Company-saved blocks

What are company-saved blocks?

This feature lets you save customised content blocks (like headers, footers, callouts) or a mix of all, to reuse across multiple emails. These saved blocks will be saved at studio level.

How to use it?

How to use it? - Design a block you use often (e.g., your studio s footer with address and social links, or a presentation block of your trainers), and click Save Design a block you use often (e.g., your studio s footer with address and social links, or a presentation block of your trainers), and click Save - Next time, drag and drop it from your saved list. Next time, drag and drop it from your saved list.

Use Cases & Benefits

Use Cases & Benefits - Save time by not recreating layouts from scratch. Save time by not recreating layouts from scratch. - Maintain brand consistency across all communications. Maintain brand consistency across all communications. - Example: Create a custom testimonial block once and reuse it in every monthly newsletter. Example: Create a custom testimonial block once and reuse it in every monthly newsletter.

Image gallery

What is the image gallery?

A built-in gallery of high-quality, license-free images adapted to email formats.

How to use it?

How to use it? - Click on Images and search by keyword (e.g., meditation, fitness, crossfit). Click on Images and search by keyword (e.g., meditation, fitness, crossfit). - Choose and insert any image directly into your email without downloading/uploading. Choose and insert any image directly into your email without downloading/uploading.

Use Cases & Benefits

Use Cases & Benefits - Quickly enrich your emails with nice-looking images when you don t have custom visuals on hand. Quickly enrich your emails with nice-looking images when you don t have custom visuals on hand. - Example: Promoting an event about mindfulness? Search for calm nature and choose a background image in seconds. Example: Promoting an event about mindfulness? Search for calm nature and choose a background image in seconds.

Saved uploads

What is it?

What is it? All images you upload into Unlayer are saved in your personal media library (directly in Unlayer).

How to use it?

How to use it? - Simply upload images as needed, they ll automatically be stored. Simply upload images as needed, they ll automatically be stored. - Use search to find and reuse past uploads easily. Use search to find and reuse past uploads easily.

Use Cases & Benefits

Use Cases & Benefits - Build a personal studio asset library over time. Build a personal studio asset library over time. - Avoid repeated uploads of logos, banners, or instructor photos. Avoid repeated uploads of logos, banners, or instructor photos. - Example: Upload your logo once, and reuse it every time without hunting for the file again. Example: Upload your logo once, and reuse it every time without hunting for the file again.

Note: If you don't know how to create a form, we have created a sheet on this subject to explain the process step by step. Here is the link to that sheet: <https://intercom.help/bsport-helpcenter/fr/articles/5545758-creer-un-formulaire-personnalise> Note: Step 1: In the Bsport Dashboard, go to "Marketing" > "Forms" and click on the form you want to automate and click on "Configure". Step 1: 2nd step: Click on the "Add a Rule" button. Attention, it is not possible to click on this button if you have not yet added any elements to your form. 2nd step: 3rd step: Set up your form. 3rd step: You can choose the type of member you want to target: - New members (the form will appear after the registration form) New members (the form will appear after the registration form) - Already registered members Already registered members You can choose to send this form to members based on how long they have been in your studio by selecting "Members already registered". - If you indicate 30 days, the form will appear for all members who have been registered for more than 30 days. If you indicate 30 days, the form will appear for all members who have been registered for more than 30 days. Also in the advanced settings, you can allow members to fill out the form later and choose when they can fill it out again. - If you do not select this option, your members will have to fill out the form to access the platform. If you do not select this option, your members will have to fill out the form to access the platform. Finally, you can force the display to members who have already filled out the form previously. - For example, for a satisfaction form that you send at the end of each month, you must select this option. Otherwise, the software will consider that the member has already answered the form the previous month. For example, for a satisfaction form that you send at the end of each month, you must select this option. Otherwise, the software will consider that the member has already answered the form the previous month. You can then add the rules you have set up by clicking on "Add". Note: The form appears like this when the customer connects to his account. Note: Note: If several different forms have the same automatic rule then they will appear on the same pop up in a paginated way. Customers will be able to answer both forms. Note: Step 4: You can edit or delete the rules on the form at any time by clicking on the edit/delete sign. In "Notification rules", click on Step 4:

Source: <https://intercom.help/bsport-helpcenter/en/articles/5753818-how-to-add-the-level-filter-when-creating-your-smartlists>

Click here to learn how to create smartlists. You can now add the level on these three filters when creating your smartlists: - First booking First booking - Booking number Booking number - Number of bookings Number of bookings Only Step: Select the "level" filter Only Step: Select the "level" filter Check "level" then select "all levels", "beginner", "intermediate" or "advanced". Finally, click on "Add" to save your filters.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/3528023-create-a-smartlist>

1st Step: Create a smartlist. Smartlists in bsport are a powerful tool for organising and targeting clients based on specific criteria. They allow you to dynamically group clients based on filters such as attendance, membership type, or activity level, enabling targeted communication and efficient client management. 1st Step: Navigate to Marketing > Smartlists. Marketing > Smartlists Click on Add a Smartlist. Add a Smartlist Enter the name of the list > Add a description > Click on "Save". For example, you could name the list 'Inactive Members - Last 30 Days' and provide a description like 'Clients who have not attended any sessions in the past month.' 2nd Step: Add filters. 2nd Step: In "General", click on "Add new filter". Select the filter of your choice based on member information, course cards, reservations or purchases. For instance, you can use filters like 'not active since 30 days' to find inactive customers or 'Bookings > Number of bookings > Booked more than [X] sessions of [class name]' to target attendees of a specific class. Select the categories you are interested in for filtering : Examples include attendance-based filters for specific classes, membership type filters for segmenting by pack, or activity-based filters to identify inactive members. Then click on "Add" when you are finished. Add In "Statistics", you can choose a time interval of the reservations for more precision. Statistics 3rd Step: Send an email to a smartlist. 3rd Step: Follow the second part of the form: <https://intercom.help/bsport-helpcenter/fr/articles/3527707> 4th Step: Follow the campaigns on the smartlist. 4th Step: Follow the following card: <https://intercom.help/bsport-helpcenter/fr/articles/3719233> 5th Step: Download a Smartlist. 5th Step: To download the smartlist in Excel version, click on "Export list".

In the choice of passes, teachers, establishments and activities you can select the elements to be included. By default, no elements are selected. You can select all, deselect all, check the boxes to be selected or search for them with the search engine.

Inbox (3 articles)

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/8172973-communicate-with-your-members-with-the-new-messaging-interface>

Elevate your communication with members through our cutting-edge messaging interface, seamlessly integrating multiple communication methods. This interface is available to communicate with your session participants, reaching out to those who have booked, cancelled, or are eagerly awaiting a spot. With the inbox add-on, it becomes possible to use this interface for 2-way communication with individual members, smartlists, or sessions. The inbox feature also offers additional options, which are described in this article.

Step 1: Open the communication interface

Step 1: Open the communication interface From a session page, the Communication button opens a Communication tab: From the inbox, you have access to all conversations from members, smartlists and sessions:

Step 2: Select your communication method

Step 2: Select your communication method You can choose to send an email, an SMS or a push notification. Note: SMS and push notifications are add-ons. To request your them, you can follow this guide on add-on integration.

Step 3: Write your message

Step 3: Write your message For push notifications and emails, your message needs a subject.

Step 3 bis: Alternatively, select an email template

Step 3 bis: Alternatively, select an email template If email is the chosen communication method, you can select an existing email template rather than writing a new mail. Use the template selector pop-up to select the desired template. Once the template is selected, 3 buttons are available: - Eye button to see a full preview of the email Eye button to see a full preview of the email - Pencil button to edit the template (you will be redirected to the template editor) Pencil button to edit the template (you will be redirected to the template editor) - Cross button to cancel your choice Cross button to cancel your choice Note that the subject of the mail can be edited without modifying the template itself.

Step 4: Use variables to enhance your message

Step 4: Use variables to enhance your message You can use variables in all 3 communication methods. To make sure they are correctly formatted, a variable selector is available. Selecting the desired variable will place it in the subject or the body of the message, depending on where your writing cursor is placed. Please note that variables in email templates will also work, but not all variables: if you select, for example, a template using variables such as “gift card value” or “appointment date”, such variables cannot work since there is no gift card or appointment to reference.

Step 5: Send the message

Step 5: Send the message For a Member [Inbox only]: For a Member [Inbox only]: - If the user does not have a registered email address or phone number, the Send button will be deactivated If the user does not have a registered email address or phone number, the Send button will be deactivated - If the member did not agree to receive marketing communication by SMS and/or by email, a warning will be displayed. You will still be able to send the communication, it's up to you to make sure the message is not a promotional message. If the member did not agree to receive marketing communication by SMS and/or by email, a warning will be displayed. You will still be able to send the communication, it's up to you to make sure the message is not a promotional message. For a Smartlist [Inbox only]: For a Smartlist [Inbox only]: The number of recipients will be displayed next to the Send button. By default, all recipients with a valid email (respectively, phone number) will be selected. Clicking on the recipients will open a pop-up to display each recipient. You can manually unselect some recipients. Recipients without valid email or phone numbers will also appear in the list, but cannot be selected. Instead, a pencil button redirects you to their member profile edit form in a new tab to add the relevant info. For a Session [From the session page or from the inbox]: For a Session [From the session page or from the inbox]: By default, no recipients are selected. Clicking “Choose recipients” will open a pop-up where you can choose recipients from the bookings, the waitlist, or the cancellations. You can select several of those categories at once, and just like smartlist, each recipient can be individually unselected. As for smartlists, recipients without valid email or phone numbers will appear, but cannot be selected.

Step 6: See previous messages

Step 6: See previous messages In this thread, you can see all previous messages in the conversation, and the date and time they were sent. The type of message is distinguishable with an icon: Email, SMS or Push Notification. For smartlists and sessions, you can see the number of recipients. Clicking on it or on the information icon will open the list of recipients, as well as the status of each message (sent/failed). For each sent message, you can see how it was sent: - For members, the inbox only displays direct messages For members, the inbox only displays direct messages - For smartlists, the message can be manual or automatic For smartlists, the message can be manual or automatic - For sessions, there are only manual messages For sessions, there are only manual messages

Step 7: Filter messages

Step 7: Filter messages Filters can be accessed differently depending on where you are: From the communication tabs: From the inbox: You can use filters to help you search through messages more quickly. Select some of the following options: - Type: Email, SMS or Push Notification Type: Email, SMS or Push Notification - Sent on: Start date and End date Sent on: Start date and End date - Messages: Sent or Received Messages: Sent or Received - [Smartlist only] Settings: Manual or Automatic [Smartlist only] Settings: Manual or Automatic - [Sessions only] Recipients (by booking status): Bookings, Cancelled bookings, or Waiting list. [Sessions only] Recipients (by booking status): Bookings, Cancelled bookings, or Waiting list.

General structure

Source: <https://intercom.help/bsport-helpcenter/en/articles/8173987-manage-your-messages-with-the-inbox>

The inbox feature is an add-on. To request the activation of the inbox, you can follow this guide on add-on integration. The inbox feature is an add-on. To request the activation of the inbox, you can follow this guide on add-on integration. This article details the functionalities of the inbox feature, which regroups all conversations with members, smartlists and sessions in one place. It assumes you are already familiar with the new messaging interface, whose functionalities are detailed in this article. To make full use of the inbox, we recommend that you activate the setting to receive answers by email on the platform. Please note that communication using SMS is an add-on. If you're in the US, UK or Canada, you can also receive answers from your members with 2-way SMS. To activate it, follow our guide on add-on integration.

General structure

In the inbox, each conversation with a member, session or smartlist is called a thread. The inbox is split into 3 parts: - The thread list section displays a list of threads ordered by the time since their last message. In this section, you can select a category of threads, filter by status, search for a specific thread, start a new thread, and change the status of each thread. The thread list section displays a list of threads ordered by the time since their last message. In this section, you can select a category of threads, filter by status, search for a specific thread, start a new thread, and change the status of each thread. - The chat section displays the history of messages for the selected thread. It is also in this section that you write and send new messages. The chat section displays the history of messages for the selected thread. It is also in this section that you write and send new messages. - The details section, collapsible, displays all the relevant information about the member, smartlist or session you're messaging. The details section, collapsible, displays all the relevant information about the member, smartlist or session you're messaging.

Start a new thread

To start a new thread from the inbox, click on the pencil button. Its behaviour will depend on which category of threads is selected: members, smartlists or sessions.

Start a thread with a member

A pop-up will display a search bar. Use it to select the member you want to communicate with: you can look up members by their first name, last name, email or phone number.

Start a thread with a smartlist

A pop-up will display a selector with a list of existing smartlists. There's also an option to create a new smartlist.

Start a thread with a session

You are redirected to a calendar view. Navigate this calendar to select the desired session.

Actions on threads

You can change the status of a thread by clicking on the "... " button on a thread item. 4 options are available: - Mark as read Mark as read - Add to favourites Add to favourites - Mute Mute - Archive Archive

Mark a thread as unread

This option is only available for threads that have been read. It is useful in case you want to remind yourself of reading this thread later. When a thread is marked as unread, the last message is treated as unread and therefore the thread item displays a red chip with 1 as the number of unread messages.

Add a thread to Favourites

A Favourite thread will have a icon on the right of its thread item. This icon will also appear in the Chat header after the contact name. A favourite thread will always appear at the top of the list. If there are several favourites to display, first the favourites are sorted by time since the last message, and then the non-favourites are displayed, sorted by time as well. You can filter the threads to only display Favourite threads, see below. You can remove the thread from your favourites by clicking on the “...” button on the thread item and selecting the “Remove as favourite” option.

Mute a thread

A Muted thread will have a icon displayed on its thread icon and in the Chat header after the contact name. When new messages are received in a muted thread, the number of unread messages on the thread item will be displayed in a grey circle rather than a red one. More importantly, newly received messages will not update the date of the last message for this thread, therefore it will not be pushed to the top of the list. Muted threads will gradually be moved to the end of the list of threads as other active threads will move to the top. However, if you read or send messages on a muted thread, the date of the last message will update. You can filter the threads to only display Muted threads, see below. You can unmute the thread by clicking on the “...” button on the thread item and selecting the “Unmute” option.

Archive a thread

An Archived thread will disappear from the Thread tab, even when searching for it with the search tab. However, the chat messages are not deleted. You can filter the threads to only display “Archived” threads, see below. There are several ways of restoring an archived chat: - by filtering for Archived threads to access the thread, and then clicking on the “...” button on the thread item and selecting the “Restore” option by filtering for Archived threads to access the thread, and then clicking on the “...” button on the thread item and selecting the “Restore” option - by receiving or sending a new message in the thread by receiving or sending a new message in the thread

Filter and search threads

Filter by category

You can choose between Members, Smartlists and Sessions.

Filter by status

There are 5 options for the filter by status.

Search bar

With this search bar, you can search by name, email and phone number for members, and by name for smartlists or sessions.

Details section

The details section is collapsible. You can expand the section by clicking on the button. You can close the details if desired.

Details tab for members

The info displayed for members is very complete and shows most of what exists on the general tab of a Member page. - Phone number and email Phone number and email - Sign up date Sign up date - Date of Birth Date of Birth - Member ID Member ID - Bar-code number with a button to display the bar code itself Bar-code number with a button to display the bar code itself - Address Address - Emergency contact info Emergency contact info - Tags Tags - Client account balance Client account balance - Number of unpaid

invoices Number of unpaid invoices - Number of documents Number of documents - Number of notes Number of notes A button can redirect you to the member profile page.

Details tab for Smartlists

The details for smartlists are: - The current number of members in the smartlist The current number of members in the smartlist - The type of filters applied to the smartlist The type of filters applied to the smartlist - Its description, if it exists Its description, if it exists A button can redirect you to the Smartlist page.

Details tab for Sessions

The displayed info is quite similar to the Session details seen from the Calendar page of the backoffice. - Bookings, occupancy rate and waiting list Bookings, occupancy rate and waiting list - Level Level - If it is online If it is online - Date and time Date and time - Teacher's picture and name Teacher's picture and name - Room and address Room and address A button can redirect you to the Session details.

Source: <https://intercom.help/bsport-helpcenter/en/articles/3329345-add-notes-for-your-students>

It is often difficult to remember all the interactions you may have with your students. With bsport notes, every time you book your students, remember what is important to them. To add and view notes, follow these 3 steps: 1st Step: Enter your notes and select the essential notes. 1st Step: Go to the account of one of your students, enter your note and click on the little eye. 2nd Step: View these notes at the beginning of your course. 2nd Step: Thanks to this little eye, the note will be highlighted at each reservation of your student as in the example below 3rd Step: Build your relationship. 3rd Step: You will be able to create different notes during the interactions you have with your students. You will also be able to create medical information in case of injuries to your students.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/5790088-archive-a-member>

If your member base comes from a migration from your previous provider, you may have many inactive members. It is also possible that some of your members have not been coming to your studio for a long time. To avoid that these inactive members come to overload your customer database you can archive them. Step 1: Archive a member Step 1: Archive a member Go to the member tab, on the line of a member click on the trash can icon. You can also do it directly on the member's form by clicking on the icon at the bottom right. The system will warn you if the member still has : - unpaid invoices unpaid invoices - active cards active cards - future reservations or appointments future reservations or appointments - recurring reservations recurring reservations - current memberships current memberships - current auto-renewal memberships

current auto-renewal memberships It is preferable to set these last elements before archiving a member Once archived, the member will no longer appear in your member list or in the member search. However, the history of all these activities (course cards purchased, reservations, invoices...) will be kept. The member will have the indication “archived” next to its name. Note: Archived members are not deleted, they are simply hidden. Therefore we keep the history of all their purchases and reservations on the platform and in the reports. The only reports where archived members are hidden are “Member” and “1st session (collective)”. Note: Step 2: Search for an archived member Step 2: Search for an archived member To search for an archived member you can click on the search field and search for the name. The list of archived members appears at the bottom of the list of active members. If you enter the member’s email, number or exact name it will appear as a search suggestion. Step 3: Filtering archived members with your smartlists Step 3: Filtering archived members with your smartlists Smartlists are by default filtered on active members, you can choose to filter them on archived members by clicking on a smartlist and in the default filter choose “Archived”. You can also select all members. Step 4: Unarchive a member Step 4: Unarchive a member To unarchive a member, go to the member’s profile. You can access it using steps 2 and 3. On the member file, click on the green button at the bottom right. Note: If the member is archived in the back office and the student reconnects to his account, the member will be automatically unarchived. Note: For more information regarding other tabs of the members’ profile, go to the [Members] of the Help Center. For more information regarding other tabs of the members’ profile, go to the [Members] of the Help Center.

1st Part: Viewing a member profile

Solution ndeg1: Find in the members, the profile has consulted Solution ndeg1: 1st Step: Click on the "members" section on the left side of the page. 1st Step: You will be redirected to a new page with the list of members. 2nd Step: Click on "view" on the line corresponding to the member whose profile you wish to view as below: 2nd Step: Solution ndeg2: Search for a member in the "search bar". Solution ndeg2: 1st Step: On the home page of your Bsport account. On the top right, there is a "search bar" that allows you to write to find a member, teacher etc... 1st Step: When you start writing, the list appears as below: 2nd Step: To select the member whose profile you want to view. You just have to click on his box. 2nd Step: Once you have successfully completed the 1st part. You can now have access to several features of the Bsport platform. Once you have selected the profile, you should arrive on a page similar to the one below, except that it is another member's profile. We are well in the "General" section as below (in the box):

2nd Part: General

1st Step: Merging two similar accounts 1st Step: You must click on "Merge" Look for a similar account. Click on the left/right arrows, the account on the right will be deleted and the account on the left will be kept. Click on "Save". 2nd Step: Modify a member account 2nd Step: You must click on "edit" in order to access the information on a member's form as below: 3rd Step: The means of communication 3rd Step: In the box below, the "means of communication" are visible. If the customer has agreed to use the means of

communication, the bell icon will vibrate. Otherwise the bell is crossed out. 4th Step: My Tags 4th Step: You can also create categories to filter your members. To apply the category, you must choose the category. After clicking on the arrow, you must click on “+ create category” to add your own categories. Then once the name is written, you must click on the green symbol on the diskette to save the category as below: You can also create sub-categories by clicking the “+” symbol on the same line as the category name. Example: If my category is “Main Sport”: I can create subcategories: Fitness; Yoga; Cross-Fit ect... After entering the name of the sub-category, you have to click on the green symbol on the diskette to save: You can delete the categories and change the subcategories by clicking on the 3 dots next to the categories as below: 5th Step: Add a note or description about the member 5th Step: You can add notes about your members’ medical information or notes about personal information if you want to follow up with your members. 3rd Part: Bookings 3rd Part: 1st Step: Go to “Bookings”. 1st Step: You must click on “Bookings” at the top of the page, to the right of “General”. 2nd Step: If a member is absent 2nd Step: To report that a member will eventually be absent, you must click on “Present” as below: 3rd Step: If a member wishes to cancel his reservation 3rd Step: To indicate that a member wishes to cancel his reservation, you must click on the cross symbol “x” as shown below: The member will be automatically credited again. 4th Step: Registration of a customer has a subscription 4th Step: You must click on “Subscribe” at the bottom right of the page, as below: Once you have clicked on “Subscribe”, the form will appear. You must fill in the following information: the subscription concerned Number of months of validity The date of the 1st collection Apply a special offer such as: free months or discounts on every invoice At the end, a summary box of the subscription appears: You must click on “Check” at the bottom left of the page to proceed to the payment: 5th Step: Invoicing a customer 5th Step: You must click on “Invoice” at the bottom right of the page, as shown below: See part 5 invoicing below in the presentation. 4th Part: Subscriptions 4th Part: 1st Step: Access to “Subscriptions”. 1st Step: To access this section, you must click on “Subscriptions” at the top of the page, to the right of “Reservations” as below: 2nd Step: Select the subscription of your choice 2nd Step: Once on the “Subscriptions” section, you can select the one you want by clicking on it, as below: 3rd Step: Invoices and Reservations associated with the subscription 3rd Step: On the right side of the subscription, a window will open. You will be able to consult the invoice and the reservations associated with the subscription. If you click on “Associated invoice” you will arrive on this page: 4th Step: Present or Absent at a reservation 4th Step: If a member is not present at a reservation, you can click on “Present”, which will be replaced by “Absent”, and conversely if a member does not finally cancel his reservation, as below: 5th Step: Delete a reservation 5th Step: If you want to “delete” the reservation, you must then click on the cross symbol “x”, just to the right of “Present”, as below: Then you have to confirm your choice to avoid handling errors by clicking on “Confirm” as below: The member will be automatically re-credited. 5th Part: Invoicing 5th Part: 1st Step: Go to the Invoicing section 1st Step: To access this section you must click on “Billing” at the top of the page, to the right of “Subscriptions” as below: You will arrive on this page: If you want to register, you have to click on the registration icon, as below: If you want to print, you have to click on the printer icon, as below: If you want to filter the data (ID; Date of purchase; Amount; Status), you have to click on the icon on the far right, as below: If you want to filter the data (ID; Date of purchase; Amount; Status), you have to click on the icon on the far right, as below: 2nd Step: Invoice a subscription 2nd Step: If you click on “Invoice” at the bottom right of the page as below: You should arrive on this page, as below: Your basket is present in the left window of the page, it summarizes all your purchases as below: If you want to go back to the previous page, you have to click on “Back” at the bottom left of the page, and if you want to have access to the member’s file, you have to click on theStep 3: In this part we will see the usefulness of the box on the right side of the page. The part: “Subscription” Choose the subscription to be billed The date of the subscription debate Click on “Add to Invoice”, a shopping cart will be created. (The cart will be explained below). You can add or not a discount. You can add multiple subscriptions by repeating the process. 2. The part: “My Store”. To access this section, you must click on “My Store”, on the top right of the page, next to Subscription, as below: In this section you can: Choose the item to be invoiced Then click on “+ Add to Invoice” to add it to the cart. To add a discount, you can manually type the amount in the bottom right hand corner Then click on “Add Discount” at the bottom left of the page You can add several items by repeating the process. You can also remove an item from your shopping cart by clicking on the “Trashcan” symbol to the right of the item, as shown below: If you wish to proceed to the payment to finalize the purchase, you can click on “EUR Payment” at the bottom right of the page, as below: This window will appear to allow you to proceed with the payment: Attention: You can pay in several payment methods, by repeating the process, they will

1st Step: Regularise a negative down payment (a customer debt). 1st Step: In the search bar, search for the customer to regularise > Click on "Adjust Balance". Write the amount of money the client has paid you and click on "Next". You can also choose not to generate an invoice if necessary. Then select a payment method and date > Finally, click on "Confirm Payment" to finalise the process. You can also add any necessary comment in the note section. For payment by credit card, go to the following page: <https://intercom.help/bsport-helpcenter/fr/articles/3447782> 2nd Step: Set up online regularisation by the student. 2nd Step: If you want the member to be able to regularise his debt alone online, you can set this up by following the form: <https://intercom.help/bsport-helpcenter/fr/articles/4185305>

Reporting (28 articles)

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/6705488-how-to-create-a-report-on-disputed-payments>

Step 1: Go to Reporting > Dispute Step 1: Reporting > Dispute Step 2: Add any filters if necessary and click Generate Report. Step 2 filters Generate Report You can then click Download Report and extract the export. This will then allow you to open the file on Excel. Download Report

Option 1: Using quick filters

Source: <https://intercom.help/bsport-helpcenter/en/articles/6325057-filter-the-data-in-your-reports>

Two options are available to filter the data in your reports: - Quick filters: as the name suggests, this method is faster and requires fewer user inputs. Quick filters: as the name suggests, this method is faster and requires fewer user inputs. - Filtered views: this system is useful to easily switch between different filters, and offers more precise filtering thanks to and/or rules management. Filtered views: this system is useful to easily switch between different filters, and offers more precise filtering thanks to and/or rules management. Note that it is possible to apply both quick filters and a filtered view to the report. In this case, the items of the report would have to match both sets of filters.

Option 1: Using quick filters

- Reporting > Select a report > Add a filter > Select which column you want to filter on. Reporting > Select a report > Add a filter > Select which column you want to filter on.
- Configure the quick filter. The options available depend on the type of data for the selected column. Configure the quick filter. The options available depend on the type of data for the selected column.
- Don't forget to generate your report again. Don't forget to generate your report again. generate your report
- You can add other quick filters to the first one. Note that the rule between filters will be "and": the filtered items will have to match all the filters. In the example below, the payments displayed will be

dated 22/08 AND be of an amount under 50EUR. You can add other quick filters to the first one. Note that the rule between filters will be “and”: the filtered items will have to match all the filters. In the example below, the payments displayed will be dated 22/08 AND be of an amount under 50EUR. and”

- A quick filter can be removed simply by clicking on the cross button and generating the report again. A quick filter can be removed simply by clicking on the cross button and generating the report again. Note: If you want to export the report, be aware that it will be filtered according to the quick filters! Note

Option 2: Using filtered views

Add filtered views to your reports to easily switch from one set of filters to another. To add a filtered view: - Report > Select a report > Add a filter > Add a filtered view. Report > Select a report > Add a filter > Add a filtered view. - Choose a name Choose a name - Choose a rule between filters: And / Or Choose a rule between filters: And / Or - And: The filtered items will have to match all the filters. And: The filtered items will have to match all the filters. And: For example, if you are creating a report on payments, and want to filter out payments greater than or equal to 50 Euros AND having been made by credit card. AND This will only show you payments greater than 50 Euros that were made by credit card. - Or: The filtered items should match at least one filter. Or: The filtered items should match at least one filter. For example, if you are reporting on payments, and want to filter out payments greater than 50 Euros OR payments with transaction fees greater than or equal to 5 Euros. This will show you your payments greater than 50 Euros and your payments with transaction fees greater than or equal to 5 Euros. - Next, select different elements to filter, according to the different columns of your report, and choose between a normal filter or a filter group. Next, select different elements to filter, according to the different columns of your report, and choose between a normal filter or a filter group. - A filter group allows you to apply a different rule and/or all filters within the group. A filter group allows you to apply a different rule and/or all filters within the group. For example, for a payment report, you can choose to create a filter that shows you all “data with a price greater than or equal to 50 Euros” And also having a “transaction fee greater than or equal to 5 Euros Or a payment method by Card, Cash, Check”. And - Click on Save Click on Save - Don’t forget to generate your report again Don’t forget to generate your report again generate report Note: If you want to export the report, be aware that it will be filtered according to the filtered view! Source: <https://intercom.help/bsport-helpcenter/en/articles/8320705-accrual-vs-cash-accounting>

Cash and accrual accounting are two widely recognized approaches to managing your company’s financial records. Understanding the distinction between these methods is crucial because they handle gift cards and internal account balances in contrasting ways. In this article, we’ll explain the differences between these two methodologies and clarify why we opt for accrual-based accounting for our Purchases report.

Purchases Consider this scenario: On August 1st, a customer purchases a GBP100 gift card from your business. Subsequently, on August 18th, the customer's friend uses the gift card to purchase a GBP100 pass. At what point did your business generate revenue? The answer will be different depending on the method of accounting utilized.

Cash-based accounting

Cash-based accounting In cash-based accounting, revenue is recognized on the day your business receives payment through methods like cash, check, or credit. This means that when a purchase is made with a gift card or the internal account balance, there is no transaction to log because no actual cash has been received. A cash-based financial report will reflect the revenue earned when a customer initially buys the gift card, but will not display the products or services subsequently acquired using that gift card. In our example scenario, the GBP100 sale is recognized as revenue when the client purchases the gift card on August 1st, and no transaction is reported when the client's friend uses the gift card on August 18th.

Accrual-based accounting

Accrual-based accounting In accrual-based accounting, revenue is recognized on the day a sale is made, regardless of when the payment is received. This means that when a purchase is made with a gift card or the internal account balance, the business will recognize revenue on that day and not on the day the balance was credited, or the gift card was purchased. An accrual-based financial report will not display the initial purchase of a gift card, but will reflect the revenue earned when a customer subsequently acquires products using that gift card. In our example scenario, the GBP100 sale is recognized as revenue when the client's friend uses the gift card on August 18th, and no transaction is reported when the client purchases the gift card on August 1st.

Why our Purchases report uses accrual-based accounting

When a business sells gift cards or offers account credit, accrual-based accounting is the recommended method. Since our platform provides both gift cards and an internal account balance, we use accrual-based accounting. Our Purchases report will not show the purchases of gift cards or the crediting of an internal account balance. **Purchases** If you need to specifically track the purchases of gift cards, our report **Purchased gift cards** can provide you with the necessary information. **Purchased gift cards**

All reports page

Source: <https://intercom.help/bsport-helpcenter/en/articles/9721753-reports-2-0>

A new version of the reports has been released! The objective of this new version is to make readability and navigation easier for you on the reports so that you can easily find the exact piece of information you are looking for. Until the 1st of October, you can switch back and forth between the old and new versions by clicking on the "Back to old version" button. However, changes made on one version will not appear on the other. will not After this date, the old version will be permanently out of access. Check below what is new with version 2.0

All reports page

On the first page, you will now see a better distribution of the reports' types, still sorted by their categories. As before, you can search a report type by its name in the search bar to find it more easily

Report detail page

Once you open a report type, you can navigate between different views. The views are made of : - One default view, that is always accessible and cannot be deleted. You can however edit the data displayed via

the edit view form One default view, that is always accessible and cannot be deleted. You can however edit the data displayed via the edit view form One default view - All your migrated views form the 1.0 version of the reports if you had created any for that report's type. These views were renamed "[Migrated] name" for you to identify them. All your migrated views form the 1.0 version of the reports if you had created any for that report's type. These views were renamed "[Migrated] name" for you to identify them. All your migrated views - All future views, that you will create from the 2.0 version of the reports All future views, that you will create from the 2.0 version of the reports All future views Note that if you had created several versions of a report in the 1.0 version (e.g. several "Basket" reports), they are now all migrated as views in the report type "Basket". Quickfilters, advanced filters, and date filters were all saved as well for every view If you wish to create a new view of this report, for example to apply specific filters, click on the "Add view" button Then name the view and click on confirm. The default view and all new views created display all available columns and data and have no quick or advanced filters.

Advanced filters and general display

If you wish to build a view that always displays only the data that you need, click on the "Edit" icon From here you can decide to rename the view, apply Advanced filters, or select/unselect the columns you want to appear in the view. Then click on "Save and Generate" Tip : Tip - Advanced filters are made to be permanently applied to your view and to be really specific thanks to and/or rules management. Use these filters if you want your view to be always filtered with these conditions Advanced filters are made to be permanently applied to your view and to be really specific thanks to and/or rules management. Use these filters if you want your view to be always filtered with these conditions Advanced filters - Quick filters are meant to be temporary filters that can be quickly applied and removed from a view. Use these filters if you want to temporarily access a specific piece of information in the view. Quick filters are meant to be temporary filters that can be quickly applied and removed from a view. Use these filters if you want to temporarily access a specific piece of information in the view. Quick filters For more information, consult our helpsheet on filtering the data in the reports

Date and quick filters

Date filters

Once the view is built according to your needs, you can filter the data on a certain date/period or items. Most of the reports can be filtered for a specific period by clicking on the date selector. You can quickly select a period or select "custom" if you have a particular period in mind. You can also click on the date/hour range selector to define your custom period. specific period With version 2.0, new date filters are available, and you can now choose to filter the view to the week, month or year to date, i.e. from the first day of the selected period to the current day. Some reports can be filtered by a unique date only and allow you to quickly filter on today's date or yesterday or to choose a custom date Note that a reminder of what the selected period is filtering on is available next to the date/time selector

Quick filters

Then you can apply quick filters to the view by clicking on "Add a quick filter" and selecting the item you want to filter on quick filters Once you have selected the date and quick filters that you possibly need, click on "Generate report". All data below will then take into account your set up As with version 1.0, you can download the report in xlsx format. The export will save advanced filters as well as date and quick filters

Delete a view

To delete a view that you don't need anymore, click on the bin icon next to the view. All views can be deleted except for the default one.

Compare reports

With version 2.0 of the reports, you will now be able to navigate faster between reports to possibly compare data. You can switch from one report to another by using the navigation menu on the left. From this navigation menu, you can also go back to the “All reports” page Here is an explanatory video : If you have feedback on version 2.0 of the reports, please do not hesitate to report it on the Feedback board accessible from your account.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7858477-setting-up-your-facebook-pixels-account-gtm>

You need to have a Facebook Business Manager account, to manage ads and also to create and moderate Pixels. To create an account: <https://business.facebook.com/overview> After creating an account, go to the Event Manager. From there you can create a Pixel. You can create a Pixel for your site, for the platform, etc. To do this you need to click on “Add Pixel”, then a banner will appear with three possibilities: - Link your Pixel to your site Link your Pixel to your site - Link your Pixel to your application Link your Pixel to your application - Link your Pixel Offline Link your Pixel Offline Choose the Pixel to your site. This pop up then appears displaying 3 options: Choose one of the two options, we recommend the partner integration because it is easier. You will then have this banner displayed: Then instructions will be given according to the partner chosen and you can analyse your site’s data with a few clicks. You can also install the pixel code in all of your site. If you have an agency or webmaster, you can also send with “Send instructions by email”.

Once done, you’ll be able to link Pixels and Google Tag Manager. To do so, follow this article.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7860900-linking-pixels-and-google-tag-manager-gtm>

Once you set up your Facebook Pixels account, you can link Google Tag Manager and Pixels. To learn how to create a Facebook Pixels account, check this article. By linking Google Tag Manager and Pixels, you can also link with bsport as the GTM tag was configured in step 1. To connect Facebook Pixels to Google Tag Manager, it happens on the Facebook side. Go to the Event Manager to create a Pixel. As in the previous step, add a Pixel to your site and click on “Use a partner”. Then you select Google Tag Manager. All you have to do is follow the steps and everything will be set up. Your Pixel and Google Tag Manager are now connected.

Once done, you will be able to create Google Tag Manager tags to track Facebook ad data. To do so, please visit this article.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7860910-create-google-tag-manager-tags-to-track-facebook-ad-data-gtm>

Once your Facebook Pixels account and Google Tag Manager are linked, you will now be able to create GTM tags, linking them to a Pixel to track activity on Facebook Pixels. To learn how to link both accounts, check this article. First things first: First things first: To allow Pixels to track events that happen on the bsport platform, you need to go through Google Tag Manager. That’s why you connected Google Tag Manager and Pixels in the previous step. You also need to make Google Tag Manager understand the events that happen on the bsport platform so that it can send them to Pixels. It is necessary to create a variable on Google Tag Manager which corresponds to the bsport event. Find all the bsport events here: <https://pastebin.pl/view/23083ef7> We are now going to create the variable for a bsport event to be sent to Pixels. For this example we will choose the click on add to cart event. Let’s create the variable. In Google Tag Manager, go to Variables > New. Then create a new variable > Data Layer Variable. Put “data” in the name of the data layer variable. Name the variable, for us it will be “dlv - data”. So we have this for the configuration: We can now move on to configuring the tag. In the Google Tag Manager platform, you can go to “Add a tag”. Then you can go to “Configure tag” and then to “Discover other types of tags”. Then you have to look for the “Facebook Pixel”, and you can easily configure Pixels in GTM this way and not go through the manual code. Then you have to configure the Pixel by naming it, putting an ID, choosing the event. We will choose the Add to Cart event. In the same way, you must configure the triggering of this tag. Go to “Trigger” at the bottom and configure it. You need to create a trigger, to do this you need to click on the “+” at the top right and create a trigger. Then you have to configure a “Custom Event”. In “Object Properties”, you must add the variable created earlier. So add “dlv-data”. Then you have to configure the triggering of this tag. Go to “Trigger” at the bottom and configure it. You need to create a trigger, to do this click on the “+” at the top right and create a trigger. Then you have to configure a “Custom Event”. From here we can name the trigger. “Add to Basket” for our example will work fine. In “Item Name” we need to enter the bsport event we want to pull up. Our item being the add-to-cart, in the file attached higher in this form we know that the bsport event that corresponds to that is: bsport:basket:add-to-cart:pass bsport:basket:add-to-cart:pass Don’t forget to check the “Use regular expression matching” box. Don’t forget to check the “Use regular expression matching” box. The configuration is finished! You can save and switch to preview mode in Google Tag Manager. Google Tag Manager’s preview or “debug” mode allows you to see the tags that are triggered on a website page. There is also the Chrome extension, Google Tag Assistant. Go to your bsport marketplace and click on an add to cart of your platform. In the GTM “Debug” you can see that the tag has been triggered. You can also check if the Pixel has been activated with the Facebook extension Pixel Helper. You can also check in the Facebook Pixel Event Manager: There you go, you can now set up Google Tag Manager events related to your platform and pull them up in Pixels.

For more information regarding how to use the Facebook Pixels and Google Tag Manager, please visit this article

Source: <https://intercom.help/bsport-helpcenter/en/articles/4722519-integration-of-a-vod-iframe-on-your-website>

1st step: Grab the VOD link on the bsport's marketplace. 1st step: To access your marketplace, enter the following link in the search bar of your browser: - backoffice.bsport.io/m/xxx/ID backoffice.bsport.io/m/xxx/ID backoffice.bsport.io/m/xxx/ID In the URL: - "/m" means that you are going to bsport's marketplace - "/xxx" means that you are going to bsport's marketplace - "/xxx" will be replaced by your studio's name - "/xxx" will be replaced by your studio's name - "/ID" is your bsport's ID - "/ID" is your bsport's ID In order to find your ID, go on the plateforme, Settings > General > "BSPORT ID". Copy the URL in the search bar of your browser and replace the "ID" by your bsport's ID and click "enter". 2nd step: Grab the URL of your VOD's tab. 2nd step: Click on the "VOD" tab of your marketplace. In the example above, we have: 3rd step: Obtain a pre filtered URL 3rd step: You also have the possibility to filter your research in order to show a specific selection of your videos. You either filter by Level, Teacher, Categories, or Duration. You can choose one or more filters here: For instance: By filtering on the Level "Intermediate" and the category "Danse Classique" on the marketplace of DanceFloor Paris, we have: 4th step: Integrate the VOD being helped by the iframe's baseline. 4th step: Use the following tag: Change the <https://backoffice.bsport.io/m/XXX/id/vod> link with the one obtained during the 2nd step. For instance, for Dancefloor Paris we have: Or with the filters: You will need to add CSS code to the style="" that you can find in the iframe in order to display it at the right size on your website. For instance: 5th step: Integrate the iframe on your website. 5th step: Copy and paste the iframe tag where you to put it on your website. For instance, with the following code: We obtain on the website:

N.B.: the screenshots in this sheet are from October 2020, the interface and the Facebook Pixels platform change regularly so the appearance may not be the same. Nevertheless, the process should remain the same. N.B.: the screenshots in this sheet are from October 2020, the interface and the Facebook Pixels platform change regularly so the appearance may not be the same. Nevertheless, the process should remain the same. First of all, what is Google Tag Manager? First of all, what is Google Tag Manager? Google Tag Manager (GTM) is a tag management system that allows you to track more advanced data. GTM quickly updates and facilitates the tracking of data on applications or websites. It is an interface that allows you to create and view the tags you create. GTM is a Tag Management System, and works like a CMS (Content Management System) except that it is not for site content but for special tags. You can track your data by linking your Google Tag Manager account to Google Analytics for example. Why do we need Google Tag Manager? Why do we need Google Tag Manager? The advantages of Google Tag Manager: - Saves time for developers. They don't need to develop it in-house, understandable interface so anyone can implement it. Saves time for developers. They don't need to develop it in-house, understandable interface so anyone can implement it. - More accurate data. Allows for custom tracking, allows for analysis of specific data/needs. More accurate data. Allows for custom tracking, allows for analysis of specific data/needs. - Increases site speed (response time, workflow, page load time) Increases site speed (response time, workflow, page load time) Why set it up for your bsport account? Why set it up for your bsport account? To be able to analyse the behaviour

of students and potential students when they are on the bsport platform linked to your account. You can analyse the different steps, clicks, sessions and others. What are Facebook Pixels? What are Facebook Pixels? The Facebook Pixel is a piece of code that allows you to retrieve data from users who have visited your website in order to build an audience. Why do we need Facebook Pixels? Why do we need Facebook Pixels? The Facebook Pixel is used to optimise advertising campaigns on Instagram and Facebook, to analyse traffic to your site via Facebook, and to track purchase path and other data related to advertising. Why to set it up for its bsport account? Why to set it up for its bsport account? To be able to analyse the behaviour of users after clicking on a Facebook or Instagram ad. To have the right data to optimize your marketing campaigns. Now you know what Google Tag Manager and Facebook Pixels are, let's start this tutorial to link these two tools to your bsport platform. The different steps to be able to get the bsport data: - Link your bsport account and Google Tag Manager Link your bsport account and Google Tag Manager - Setting up your Google Tag Manager account Setting up your Google Tag Manager account - Set up your Facebook Pixels account Set up your Facebook Pixels account - Link Pixels and Google Tag Manager Link Pixels and Google Tag Manager - Create Google Tag Manager tags to track Facebook ads data Create Google Tag Manager tags to track Facebook ads data - Check that actions on the platform are reported to Pixels Check that actions on the platform are reported to Pixels For this tutorial you will need: - A Google Tag Manager account A Google Tag Manager account - A Facebook Business Manager account, which gives access to Facebook Pixels A Facebook Business Manager account, which gives access to Facebook Pixels - A bsport account A bsport account - Link your Google Tag Manager account and bsport Link your Google Tag Manager account and bsport To link your Google Tag Manager account and bsport you only need two things: - To know your Google Tag Manager identifier To know your Google Tag Manager identifier - Enter your Google Tag Manager ID in the bsport platform Enter your Google Tag Manager ID in the bsport platform To know your Google Tag Manager ID you just have to go to the GTM interface and find your ID. You can find it here: The number next to GTM is your ID. Then, go to your bsport platform as an admin. You must enter your Google Tag Manager ID in Settings > General > Google Tag ID Now your bsport account and Google Tag Manager are linked. Set up your Google Tag Manager account Set up your Google Tag Manager account Now you can set up your GTM account to track your platform data. Google Tag Manager works with 3 settings: - Tags. Creating one allows you to set rules, to choose what you want to track. This can be a page view, pull information from Google Analytics/Facebook Pixels, etc/ Tags. Creating one allows you to set rules, to choose what you want to track. This can be a page view, pull information from Google Analytics/Facebook Pixels, etc/ Tags - Triggers, the data you want to track, tag that will be triggered by a certain action. For example: click on video, click on article, add cart, etc. Triggers, the data you want to track, tag that will be triggered by a certain action. For example: click on video, click on article, add cart, etc. Triggers - Variables, variables that can be applied to the triggers to have a more accurate tracking Variables, variables that can be applied to the triggers to have a more accurate tracking Variables You can now create tags in order to track the data on your bsport platform. To analyse them, you must link your Google Tag Manager account to Google Analytics. you must link your Google Tag Manager account to Google Analytics. To create a tag in Google Tag Manager click on 'Tags' in the left sidebar, then new. After creating a Google Analytics account and linking it to Google Tag Manager, this is done automatically. Then on the Google Tag Manager platform, you have to create a tag > Google Analytics: Universal Analytics The configuration is done automatically and all you have to do is choose the variable and the trigger for the tag. For the triggering of the tag you have to choose "All Pages" Page View, so that the tag is triggered each time it is viewed/uploaded on the platform. Once done, you will be taken to a page that looks like this: You can preview, check that the tag is triggered when viewed on the platform/on your site and publish! This is the same principle for all other possible tags on Google Tag Manager. Setting up your Facebook Pixels account Setting up your Facebook Pixels account You need to have a Facebook Business Manager account, to manage ads and also to create and moderate Pixels. To create an account: <https://business.facebook.com/overview> After creating an account, go to the Event Manager. From there you can create a Pixel. You can create a Pixel for your site, for the platform, etc. To do this you need to click on "Add Pixel", then a banner will appear with three possibilities: - Link your Pixel to your site Link your Pixel to your site - Link your Pixel to your application Link your Pixel to your application - Link your Pixel Offline Link your Pixel Offline Choose the Pixel to your site. This pop up then appears displaying 3 options: Choose one of the two options, we recommend the partner integration because it is easier. You will then have this banner displayed: Then instructions will be given according to the partner chosen and you can analyse your site's data with a few

clicks. You can also install the pixel code in all

of your site. If you have an agency or webmaster, you can also send with “Send instructions by email”.

Linking Pixels and Google Tag Manager

Linking Pixels and Google Tag Manager You can now link Google Tag Manager and Pixels. By linking Google Tag Manager and Pixels, you can also link with bsport as the GTM tag was configured in step 1. To connect Facebook Pixels to Google Tag Manager, it happens on the Facebook side. Go to the Event Manager to create a Pixel. As in the previous step, add a Pixel to your site and click on “Use a partner”. Then you select Google Tag Manager. All you have to do is follow the steps and everything will be set up. Your Pixel and Google Tag Manager are now connected. Create Google Tag Manager tags to track Facebook ad data

Create Google Tag Manager tags to track Facebook ad data We will now create GTM tags, linking them to a Pixel to track activity on Facebook Pixels. First things first: First things first: To allow Pixels to track events that happen on the bsport platform, you need to go through Google Tag Manager. That’s why you connected Google Tag Manager and Pixels in the previous step. You also need to make Google Tag Manager understand the events that happen on the bsport platform so that it can send them to Pixels. It is necessary to create a variable on Google Tag Manager which corresponds to the bsport event. Find all the bsport events here. We are now going to create the variable for a bsport event to be sent to Pixels. For this example we will choose the click on add to cart event. Let’s create the variable. In Google Tag Manager, go to Variables > New. Then create a new variable > Data Layer Variable. Put “data” in the name of the data layer variable. Name the variable, for us it will be “dlv - data”. So we have this for the configuration: We can now move on to configuring the tag. In the Google Tag Manager platform, you can go to “Add a tag”. Then you can go to “Configure tag” and then to “Discover other types of tags”. Then you have to look for the “Facebook Pixel”, and you can easily configure Pixels in GTM this way and not go through the manual code. Then you have to configure the Pixel by naming it, putting an ID, choosing the event. We will choose the Add to Cart event. In the same way, you must configure the triggering of this tag. Go to “Trigger” at the bottom and configure it. You need to create a trigger, to do this you need to click on the “+” at the top right and create a trigger. Then you have to configure a “Custom Event”. In “Object Properties”, you must add the variable created earlier. So add “dlv-data”. Then you have to configure the triggering of this tag. Go to “Trigger” at the bottom and configure it. You need to create a trigger, to do this click on the “+” at the top right and create a trigger. Then you have to configure a “Custom Event”. From here we can name the trigger. “Add to Basket” for our example will work fine. In “Item Name” we need to enter the bsport event we want to pull up. Our item being the add-to-cart, in the file attached higher in this form we know that the bsport event that corresponds to that is: bsport:basket:add-to-cart:pass bsport:basket:add-to-cart:pass Don’t forget to check the “Use regular expression matching” box. Don’t forget to check the “Use regular expression matching” box. The configuration is finished! You can save and switch to preview mode in Google Tag Manager. Google Tag Manager’s preview or “debug” mode allows you to see the tags that are triggered on a website page. There is also the Chrome extension, Google Tag Assistant. Go to your bsport marketplace and click on an add to cart of your platform. In the GTM “Debug” you can see that the tag has been triggered. You can also check if the Pixel has been activated with the Facebook extension Pixel Helper. You can also check in the Facebook Pixel Event Manager: There you go, you can now set up Google Tag Manager events related to your platform and pull them up in Pixels.

Master-Account (5 articles)

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7973666-franchise-fees-on-sales>

As a franchisor, you are likely to take a percentage of the sales made by your franchisees: use this information sheet to find out how this can be taken into account on the platform. Step 1: Indicate franchise fees Step 1: You can set different fees for each of your franchisees, but you can't do this directly from the platform. If you are interested in this feature, contact your account manager so that he can set up the percentages. Step 2: Find the commission in the reports Step 2: In the purchases report (available on the Report page), you can then add the columns "Franchisee fees incl. tax" and/or "Franchisee fees excl. tax": On each purchase, you'll find the fees owed by the franchised studios.

Intercom

Source: <https://intercom.help/bsport-helpcenter/en/articles/7973452-share-tags-across-a-franchise>

You can use the Master Account to create tags that are shared between franchisees. Step 1: Create tags on the Master Account Step 1: Create tags on the Master Account On the Master Account, go to the Tags tab. As for the other tags, you can define main tags with a name, and sub tags with a name, a colour and an icon. Step 2: Use the shared tags in the franchisee accounts Step 2: Use the shared tags in the franchisee accounts You cannot apply tags from the Master Account, but the tags created from the Master Account are available to be used by any franchisee. Shared tags are applied to all franchisees in such a way that any change will be reflected across the companies. If a member is tagged with one of these, they will be tagged immediately in all companies of the franchise. Step 3: Edit tags Step 3: Edit tags You can edit and delete shared tags from the Master Account, and the changes will be reflected across all franchisees. You cannot edit nor delete the shared tags from a franchisee account.

Goal

Source: <https://intercom.help/bsport-helpcenter/en/articles/9424899-how-to-manage-email-campaigns-for-franchises>

Goal

Campaigns can be sent from the master account (MA), but the emails are not sent directly from the MA; they are sent from the franchisee’s backoffice (BO). Understanding this logic is crucial to know who will be billed.

Sending a Campaign

When sending a campaign from the master account, you have the choice between: - Selecting a template
Selecting a template - Select studios
Select studios

Franchisee Email

The list of franchisee emails corresponds to the company email of each franchisee. **WARNING:** It does not correspond to the company’s sender email.

Custom Email Domain

The custom domain must be defined in the admin under Franchisor.

Sending Logic

The sending logic is a bit peculiar. Emails are not sent from the master account but from each of the franchisees. On the customer side, members will still see the franchisee email or custom email selected even though the email is actually sent from another franchisee.

All Members Campaign

If the “all members” toggle is activated: - The system will start with the first franchisee in alphabetical order. The system will start with the first franchisee in alphabetical order. the first franchisee in alphabetical order - It will send the communication to all the members of this franchisee. It will send the communication to all the members of this franchisee. - Then, the system will proceed to the next franchisee in alphabetical order and send communications to its members, ensuring not to contact the previously contacted members again. Then, the system will proceed to the next franchisee in alphabetical order and send communications to its members, ensuring not to contact the previously contacted members again. - And so on... And so on... For franchises with a shared database (all of our franchises), this means that it is always the first franchisee in alphabetical order that will send the emails and also pay for them.

Smartlist Filtering

You can also deactivate the “send to all members” toggle to filter the franchisees and add a smartlist to filter even more within those franchisees. - Here, there is no alphabetical order. The system arbitrarily chooses which franchisee to start with. Here, there is no alphabetical order. The system arbitrarily chooses which franchisee to start with. - Then it moves on to the other selected franchisees and so on, following the same rules as stated before. Then it moves on to the other selected franchisees and so on, following the same rules as stated before. - We do not take the intersection of smartlist/studios for the list of members to whom we are going to send the communications. Meaning that if I have Studio A and Studio B, and Member 1 is part of Studio A but not B, if those two studios are selected for the campaign, the member will receive the communication. Basically, we take all the members from all the smartlists/studios selected. We do not take the intersection of smartlist/studios for the list of members to whom we are going to send the communications. - Meaning that if I have Studio A and Studio B, and Member 1 is part of Studio A but not B, if those two studios are selected for the campaign, the member will receive the communication. Meaning that if I have Studio A and Studio B, and Member 1 is part of Studio A but not B, if those two studios are selected for the campaign, the member will receive the communication. - Basically, we take all the members from all the smartlists/studios selected. Basically, we take all the members from all the smartlists/studios selected. - In this case, it is difficult to know exactly which studios will send the communication. It is most likely that all studios will send something. In this case, it is difficult to know exactly which studios will send the communication. It is most likely that all studios will send something.

Select a Sending Studio

In the case the franchise has a shared database AND the manager wants to send a communication to all the members: Normally, it is always the first franchisee in alphabetical order that will send the communications and pay for them. But if you want to select another one: - In the desired franchisee, create a smartlist with all members. In the desired franchisee, create a smartlist with all members. - In the master account, uncheck “all members” and only activate the desired franchisee. In the master account, uncheck “all members” and only activate the desired franchisee. - Then select the smartlist you just created. Then select the smartlist you just created. - Send, and it’s done. This franchisee will be the one sending the communications and paying for them. Send, and it’s done. This franchisee will be the one sending the communications and paying for them. Remember, even though all communications are coming from one franchisee, the sender email that will appear for the member is the one selected. Watch this video to create your GDA: Step 1: Prepare the necessary information Step 1: Prepare the necessary information Before starting, make sure you have the following information: - A professional Gmail address A professional Gmail address - Your company's legal information (name, address, phone number, etc.) Your company's legal information (name, address, phone number, etc.) - A credit card to pay the registration fee (25 USD) A credit card to pay the registration fee (25 USD) - Your DUNS number (You can find or request your DUNS number on the [Dun & Bradstreet] website) Your DUNS number (You can find or request your DUNS number on the [Dun & Bradstreet] website) - The ID of one of the company's legal representatives The ID of one of the company's legal representatives Step 2: Create a Google account Step 2: Create a Google account - Go to [Google] and sign in with your professional Google account. If you don't have a Google account yet, click "Create an account" and follow the instructions. Go to [Google] and sign in with your professional Google account. If you don't have a Google account yet, click "Create an account" and follow the instructions. Step 3: Access Google Play Console Step 3: Access Google Play Console - Go to the [Google Play Console] website. Go to the [Google Play Console] website. - Sign in with your Professional Google account. Sign in with your Professional Google account. Step 4: Register as an Organisational developer Step 4: Register as an Organisational developer - Once signed in, click "Register now" as an Organisational Account to start the registration process. Once signed in, click "Register now" as an Organisational Account to start the registration process. Organisational Account - Accept the terms of use by checking the appropriate box. Accept the terms of use by checking the appropriate box. - Click "Continue to payment" to go to the payment page. Click "Continue to payment" to go to the payment page. Step 5: Pay the registration fee Step 5: Pay the registration fee - On the payment page, enter your credit card information. On the payment page, enter your credit card information. - Click "Buy" to pay the 25 USD registration fee (this amount will be deducted from your next invoice). Click "Buy" to pay the 25 USD registration fee (this amount will be deducted from your next invoice). Step 6: Complete the developer account profile Step 6: Complete the developer account profile - After payment, you will be redirected to the Google Play Console to complete your profile. After payment, you will be redirected to the Google Play Console to complete your profile. - Fill in the requested information, such as: Company name Address Phone number Contact email address DUNS number (How to get it) Fill in the requested information, such as: - Company name Company name - Address Address - Phone number Phone number - Contact email address Contact email address - DUNS number (How to get it) DUNS number (How to get it) - Validate your information and click "Save". Validate your information and click "Save". Step 7: Verify your email address Step 7: Verify your email address - Google will send a verification email to the provided address. Google will send a verification email to the provided address. - Open the email and click the verification link. Open the email and click the verification link. Step 8: Set up payment details Step 8: Set up payment details - In Google Play Console, go to the "Settings" section. In Google Play Console, go to the "Settings" section. - Click on "Account settings" then "Payment details". Click on "Account settings" then "Payment details". - Follow the instructions to set up your payment profile using your ID and any other necessary information.

Follow the instructions to set up your payment profile using your ID and any other necessary information.

Step 9: Add bsport as an administrator of your Organisational Google Developer account

Step 9: Add bsport as an administrator of your Organisational Google Developer account - Go to user settings

In the left menu, go to “Settings”. Click on “Access and permissions”. Go to user settings - In the left menu, go to “Settings”. In the left menu, go to “Settings”. - Click on “Access and permissions”. Click on “Access and permissions”. - Invite a new user

Click “Invite a new user”. Invite a new user - Click “Invite a new user”. Click “Invite a new user”. - Enter the email address to add (provided by your account manager). Enter the email address to add (provided by your account manager). 3. Assign the role of administrator - Select the “Administrator” role to give full access. Select the “Administrator” role to give full access. - Click “Send invitation”. Click “Send invitation”. 4. Accept the invitation - The user will receive an email with an invitation. The user will receive an email with an invitation. - They must accept the invitation by clicking the link and signing in to Google Play Console. They must accept the invitation by clicking the link and signing in to Google Play Console. This important step is now complete. You will receive an email from your account manager informing you that your application is now available on the Play Store. bsport team bsport team

Troubleshooting D-U-N-S Verification Issues

Source: <https://intercom.help/bsport-helpcenter/en/articles/9471946-how-to-obtain-a-duns-number>

Why a D-U-N-S number is required

To publish apps on Google Play Store (organizational account) and Apple App Store, a D-U-N-S Number is required. This unique 9-digit identifier, issued by Dun & Bradstreet (D&B), verifies your business's legal identity. Google Play Store Apple App Store D-U-N-S Number Cross-platform note: A single D-U-N-S number can be used for verification on both Google and Apple platforms. Cross-platform note:

1. What is a D-U-N-S Number?

1. What is a D-U-N-S Number? A D-U-N-S number is a unique 9-digit identifier that verifies a company's legal existence. Some companies receive a D-U-N-S automatically, while others need to request it.

2. Why You Need a D-U-N-S Number

2. Why You Need a D-U-N-S Number

Google Developer Account (GDA)

- Required for organizational accounts to pass Google's identity verification. Required for organizational accounts to pass Google's identity verification.
- Mandatory for publishing Android apps under a company name. Mandatory for publishing Android apps under a company name.
- Ensures smoother, faster app deployment versus a personal account. Ensures smoother, faster app deployment versus a personal account. **WARNING:** Note for sole proprietors/freelancers: If you cannot obtain a D-U-N-S number, you may use a personal Google Developer Account, which will publish apps under your personal name. Note for sole proprietors/freelancers:

Apple Developer Program (ADP)

- Required for all organization-type enrollees to verify legal entity status. Required for all organization-type enrollees to verify legal entity status.
- A D-U-N-S number ensures your account is recognized as a verified organization. A D-U-N-S number ensures your account is recognized as a verified organization.

3. Steps to Obtain a D-U-N-S Number

3. Steps to Obtain a D-U-N-S Number Follow these steps to check for and request your number.

Step 1: Check if Your Company Already Has One

Step 1: Check if Your Company Already Has One - If your company is registered in France, Belgium, Spain, Italy, Portugal, Luxembourg, The Netherlands, or Morocco D&B has delegated exclusive D-U-N-S verification in these countries to its official partner Verif Obtain your D-U-N-S via Verif – mandatory one-time fee of EUR39 (excl. VAT) If your company is registered in France, Belgium, Spain, Italy, Portugal, Luxembourg, The Netherlands, or Morocco If your company is registered in France, Belgium, Spain, Italy, Portugal, Luxembourg, The Netherlands, or Morocco - D&B has delegated exclusive D-U-N-S verification in these countries to its official partner Verif D&B has delegated exclusive D-U-N-S verification in these countries to its official partner Verif Verif - Obtain your D-U-N-S via Verif – mandatory one-time fee of EUR39 (excl. VAT) Obtain your D-U-N-S via Verif – mandatory one-time fee of EUR39 (excl. VAT) one-time fee of EUR39 (excl. VAT) - If your company is located in another country Go to the D-U-N-S Lookup Tool. Search by either: Company registration number and country, or Legal company name and country If the company appears: Click Email to receive your D-U-N-S number If the company does not appear, it likely does not yet have a D-U-N-S number. If your company is located in another country - Go to the D-U-N-S Lookup Tool. Go to the D-U-N-S Lookup Tool. - Search by either: Company registration number and country, or Legal company name and country Search by either: - Company registration number and country, or Company registration number and country, or Company registration number - Legal company name and country Legal company name and country Legal company name - If the company appears: Click Email to receive your D-U-N-S number If the company appears: - Click Email to receive your D-U-N-S number Click Email to receive your D-U-N-S number Email - If the company does not appear, it likely does not yet have a D-U-N-S number. If the company does not appear, it likely does not yet have a D-U-N-S number. not yet have a D-U-N-S number.

Step 2: Apply for a D-U-N-S Number (if not found)

Step 2: Apply for a D-U-N-S Number (if not found) - Request a D-U-N-S number here Request a D-U-N-S number here - Create an account and submit your business information: Business name Address Ownership Industry Create an account and submit your business information: - Business name Business name - Address Address - Ownership Ownership - Industry Industry - Verification typically takes a few days, but can vary by country. Verification typically takes a few days, but can vary by country. a few days - Some countries may have additional costs (Italy, Spain, Morocco, etc.) Some countries may have additional costs (Italy, Spain, Morocco, etc.) Alternative method: If the online system does not work, you can email D&B support at support@dnb.com with your company details to request a D-U-N-S number manually. Alternative method: D&B support

Country-Specific Updates: Country-Specific Updates: - Italy: The Italian market now uses CRIBIS to request a D-U-N-S number. Italy: The Italian market now uses CRIBIS to request a D-U-N-S number. Italy: CRIBIS - Spain: The Spanish market uses Informa for D-U-N-S requests. Spain: The Spanish market uses Informa for D-U-N-S requests. Spain: Informa - Morocco: Requires applying through an authorized D&B representative; may involve fees up to \$500 USD. Morocco: Requires applying through an authorized D&B representative; may involve fees up to \$500 USD. Morocco:

4. Important Country-Specific Note: Morocco

4. Important Country-Specific Note: Morocco The process for companies based in Morocco is not always automatic through the standard website. Morocco
 - If the lookup tool does not find your number and the online application system does not work, you will likely need to apply through an authorized D&B representative in your region. If the lookup tool does not find your number and the online application system does not work, you will likely need to apply through an authorized D&B representative in your region. authorized D&B representative

- WARNING: Please be aware: This request may involve a fee, which can be up to \$500 USD. WARNING: Please be aware: This request may involve a fee, which can be up to \$500 USD. WARNING: Please be aware:

Final Recommendation

Final Recommendation Keep information updated: Ensure that your business information is current and accurate in the D&B database. This helps maintain your business credit file accurately. Keep information updated

Troubleshooting D-U-N-S Verification Issues

If your app publishing process is blocked due to D-U-N-S verification issues, a practical workaround is available: - Create an individual Apple Developer account initially. Create an individual Apple Developer account initially. - After successful setup, request Apple to upgrade it to a professional or organization account. This bypasses the D-U-N-S verification at the onset, simplifying the process for businesses. After successful setup, request Apple to upgrade it to a professional or organization account. This bypasses the D-U-N-S verification at the onset, simplifying the process for businesses. WARNING: Troubleshooting tip: Troubleshooting tip: - If Apple does not recognize your D-U-N-S number: Double-check your company's legal name and country. Ensure the D-U-N-S number is active and corresponds to your legal entity. Contact Apple Developer Support if verification fails. If Apple does not recognize your D-U-N-S number: - Double-check your company's legal name and country. Double-check your company's legal name and country. - Ensure the D-U-N-S number is active and corresponds to your legal entity. Ensure the D-U-N-S number is active and corresponds to your legal entity. - Contact Apple Developer Support if verification fails. Contact Apple Developer Support if verification fails.

Why is Google requesting Android mobile device verification?

Why is Google requesting Android mobile device verification? - Google requires developers to verify that they have access to an Android mobile device in order to publish apps on Google Play. This ensures that developers have the necessary tools to test their apps and to maintain app quality and security standards. Only the account owner of the Google Developer Account (GDA) can complete this verification. Google requires developers to verify that they have access to an Android mobile device in order to publish apps on Google Play. This ensures that developers have the necessary tools to test their apps and to maintain app quality and security standards. Only the account owner of the Google Developer Account (GDA) can complete this verification. Only the account owner

Step-by-Step Guide for Verification:

Step-by-Step Guide for Verification: 1. Download the Google Play Console App on an Android Device: 1. Download the Google Play Console App on an Android Device: - If the company owner (the owner of the GDA) doesn't already have the Google Play Console app installed on their Android device, they will need to: Scan the QR code shown in the image provided, or Search for the Google Play Console app on the Google Play Store and download it manually. If the company owner (the owner of the GDA) doesn't already have the Google Play Console app installed on their Android device, they will need to: - Scan the QR code shown in the image provided, or Scan the QR code shown in the image provided, or - Search for the Google Play Console app on the Google Play Store and download it manually. Search for the Google Play Console app on the Google Play Store and download it manually. 2. Sign in to the Google Play Console App: 2. Sign in to the Google Play Console App: - Once the app is installed, they must sign in using the same Google account they are using for the Google Developer Account (the same email as shown in the instructions, e.g., google-developer-android-1@bsport.io). Once the app is installed, they must sign in using the same Google account they are using for the Google Developer Account (the same email as shown in the instructions, e.g., google-developer-android-1@bsport.io). Once the app is installed, they must sign in using the same Google account they are using for the Google Developer Account (the same email as shown in the instructions, e.g., google-developer-android-1@bsport.io). 3. Verify Access to the Developer Account: 3. Verify Access to the Developer Account: - After signing in, select the appropriate Developer Account (in this case, it should be the company account). After signing in, select the appropriate Developer Account (in this case, it should be the company account). After signing in, select the appropriate Developer Account (in this case, it should be the company account). - Follow the instructions that appear in the app to complete the verification process on the Android device. Follow the instructions that appear in the app to complete the verification process on the Android device.

What to Do if the Client Does Not Have an Android Device:

What to Do if the Client Does Not Have an Android Device: If the client (the company owner) does not have access to an Android device, there are a few options: 1. Use an Android Device Temporarily: 1. Use an Android Device Temporarily: - The owner can borrow an Android device temporarily to complete the verification. The owner can borrow an Android device temporarily to complete the verification. - They would need to install the Google Play Console app, sign in with their account, and follow the same steps outlined above. They would need to install the Google Play Console app, sign in with their account, and follow the

same steps outlined above. 2. Allow the Account Manager to Verify on Your Behalf: 2. Allow the Account Manager to Verify on Your Behalf: - The owner can provide their Google Developer Account credentials to their bsport account manager, who can complete the verification on their behalf using an Android device. The owner can provide their Google Developer Account credentials to their bsport account manager, who can complete the verification on their behalf using an Android device. 3. Purchase an Android Device: 3. Purchase an Android Device: - If the owner frequently needs to manage Android apps, it might be worth investing in a basic Android device to handle verifications, testing, and development. If the owner frequently needs to manage Android apps, it might be worth investing in a basic Android device to handle verifications, testing, and development. 4. Contact Google Support: 4. Contact Google Support: - If none of the above options are feasible, the client can contact Google Support and explain that they do not have access to an Android device. Google may provide an alternative verification method or offer further guidance. If none of the above options are feasible, the client can contact Google Support and explain that they do not have access to an Android device. Google may provide an alternative verification method or offer further guidance. 5. Emulate Android: 5. Emulate Android: - Another option is to use an Android emulator on a computer. Tools like Android Studio provide virtual devices that could potentially be used to run the Play Console app. However, this approach is less reliable and may not be officially supported by Google for verification purposes. Another option is to use an Android emulator on a computer. Tools like Android Studio provide virtual devices that could potentially be used to run the Play Console app. However, this approach is less reliable and may not be officially supported by Google for verification purposes.

Source: <https://intercom.help/bsport-helpcenter/en/articles/11560270-how-to-verify-your-organization-s-website-with-a-custom-domain-for-google-play-console>

If your organization uses a custom domain (e.g. from GoDaddy, Squarespace, etc.), you ll need to verify it in the Google Play Console to link your website to your app. custom domain verify it in the Google Play Console

First: Watch the Video Tutorial

Before starting, we recommend watching this short video guide:

Then: Follow the Step-by-Step Instructions Below

Use the instructions below to complete the domain verification in Google Play Console.

Step 1: Log in to Google Play Console

Step 1: Log in to Google Play Console - Once logged in, you will see a message prompting you to verify your organization s website. Once logged in, you will see a message prompting you to verify your organization s website. - On the right side, click on the Details option. On the right side, click on the Details option. Details - Scroll down until you see two options: Go to Search Console and Verify Website. Scroll down until you see two options: Go to Search Console and Verify Website. Go to Search Console Verify Website - First, click on Go to Search Console. First, click on Go to Search Console. Go to Search Console

Step 2: Access Google Search Console

Step 2: Access Google Search Console - You will be redirected to the Google Search Console page. You will be redirected to the Google Search Console page. - Click Start now. Click Start now. Start now - Again, you will be directed to another page. Again, you will be directed to another page. - Before proceeding, check the email address in the top right corner of the page. Before proceeding, check the email address in the top right corner of the page. - Make sure this email matches the email used to create your Google Play Console account. Make sure this email matches the email used to create your Google Play Console account. - To verify which email you used for Google Play Console, go to Users and Permissions in your Play Console. To verify which email you used for Google Play Console, go to Users and Permissions in your Play Console. Users and Permissions

Step 3: Choose Verification Method

Step 3: Choose Verification Method - In Google Search Console, you will see two verification options: Domain URL Prefix In Google Search Console, you will see two verification options: - Domain Domain Domain - URL Prefix URL Prefix URL Prefix - Since you have a custom domain, choose the Domain option. Since you have a custom domain, choose the Domain option. Domain - Enter your domain name without the https:// or www . For example: example.com. Enter your domain name without the https:// or www . For example: example.com. - Click Continue. Click Continue. Continue

Step 4: Add TXT Record to Your DNS

Step 4: Add TXT Record to Your DNS - You will get a TXT record code to add to your domain s DNS settings. You will get a TXT record code to add to your domain s DNS settings. - If your domain provider is GoDaddy, you may be able to do an automatic verification. If your domain provider is GoDaddy, you may be able to do an automatic verification. - Otherwise, select Any DNS provider. Otherwise, select Any DNS provider. Any DNS provider - Copy the TXT record provided (it will look like a string of letters and numbers). Copy the TXT record provided (it will look like a string of letters and numbers).

Step 5: Add TXT Record to Your Domain Provider

Step 5: Add TXT Record to Your Domain Provider - Open a new browser tab and go to your domain provider's help center (e.g., GoDaddy Help Center, Squarespace Help Center). Open a new browser tab and go to your domain provider's help center (e.g., GoDaddy Help Center, Squarespace Help Center). - Search for Add TXT record. Search for Add TXT record. Add TXT record - Follow the instructions to add the TXT record to your DNS settings. Follow the instructions to add the TXT record to your DNS settings. - Usually, you will: Go to your domain management or DNS settings page Add a new TXT record Paste the copied TXT record into the value/points-to field Leave the name/host field empty or use @ (depending on provider) Save the record Usually, you will: - Go to your domain management or DNS settings page Go to your domain management or DNS settings page - Add a new TXT record Add a new TXT record - Paste the copied TXT record into the value/points-to field Paste the copied TXT record into the value/points-to field - Leave the name/host field empty or use @ (depending on provider) Leave the name/host field empty or use @ (depending on provider) - Save the record Save the record

Step 6: Wait for DNS Propagation

Step 6: Wait for DNS Propagation - DNS changes can take anywhere from a few minutes to 48 hours to propagate globally. DNS changes can take anywhere from a few minutes to 48 hours to propagate globally. - Do not panic if verification fails immediately. Do not panic if verification fails immediately. - Some providers may take up to 72 hours. Some providers may take up to 72 hours. - After waiting, return to Google Search Console and click Verify. After waiting, return to Google Search Console and click Verify. Verify

Step 7: Confirm Website Ownership in Search Console

Step 7: Confirm Website Ownership in Search Console - If verification is successful, you will see a green confirmation message. If verification is successful, you will see a green confirmation message. - This means your ownership is validated. This means your ownership is validated. - Note the difference between validation and verification – for Google Search Console, validation confirms ownership. Note the difference between validation and verification – for Google Search Console, validation confirms ownership.

Step 8: Finalize Verification in Google Play Console

Step 8: Finalize Verification in Google Play Console - Return to Google Play Console. Return to Google Play Console. - Click on Verify Website. Click on Verify Website. Verify Website - Scroll down to the Organization Website section. Scroll down to the Organization Website section. Organization Website - Make sure the website URL matches exactly the domain you verified in Search Console. Make sure the website URL matches exactly the domain you verified in Search Console. - Ensure the email on the top right matches the one used in Google Play Console. Ensure the email on the top right matches the one used in Google Play Console. - Click Send Verification Link. Click Send Verification Link. Send Verification Link - This option is only available if you are the account owner. This option is only available if you are the account owner.

Troubleshooting Tips

Troubleshooting Tips - If you see an error, double-check that: The emails used in Google Search Console and Google Play Console are the same. The website URLs match exactly (no missing letters or typos). If you see an error, double-check that: - The emails used in Google Search Console and Google Play Console are the same. The emails used in Google Search Console and Google Play Console are the same. - The website URLs match exactly (no missing letters or typos). The website URLs match exactly (no missing letters or typos). - If needed, delete the organization website URL and re-enter it correctly. If needed, delete the organization website URL and re-enter it correctly. - If verification still fails, wait 48-72 hours and try again. If verification still fails, wait 48-72 hours and try again.

Step-by-Step Guide

Source: <https://intercom.help/bsport-helpcenter/en/articles/11848988-how-to-set-up-a-service-account-for-automatic-android-app-updates>

We use Service accounts to update your Android app seamlessly. Service accounts are a secure tool that connects your app on Google Play to the bsport system so we can publish updates automatically, without your manual effort. Since you own the Google Developer Account, you must create this service account – but don't worry, we'll walk you through the simple steps below! You can also watch our step-by-step video tutorial here: [What You Need Before You Start](#). Before starting, make sure you have: [OK] Access to Google Cloud Console [OK] Admin rights to your Google Developer Account (GDA)

Step-by-Step Guide

Step-by-Step Guide

Step 1: Create a Google Cloud Project

Step 1: Create a Google Cloud Project - Go to the Google Cloud Project creation page. **WARNING: Important:** Ensure you are logged into the exact same Google account used for your Developer Account (GDA). Go to the Google Cloud Project creation page. **WARNING: Important:** Ensure you are logged into the exact same Google account used for your Developer Account (GDA). **WARNING: Important:** exact same Google account - Create a new project with the following details: Project Name: apps Organization: Select your personal name or your company's name, depending on your account type. Note: If you are using a business email that is not yet linked to an organization, you will need to create a new project here and may need to delete any previous, incorrectly-associated projects. Location: Select the appropriate location for your organization, if prompted. Create a new project with the following details: - Project Name: apps Project Name: apps Project Name: - Organization: Select your personal name or your company's name, depending on your account type. Note: If you are using a business email that is not yet linked to an organization, you will need to create a new project here and may need to delete any previous, incorrectly-associated projects. Organization: Select your personal name or your company's name, depending on your account type. Organization: - Note: If you are using a business email that is not yet linked to an organization, you will need to create a new project here and may need to delete any previous, incorrectly-associated projects. Note: If you are using a business email that is not yet linked to an organization, you will need to create a new project here and may need to delete any previous, incorrectly-associated projects. - Location: Select the appropriate location for your organization, if prompted. Location: Select the appropriate location for your organization, if prompted. Location: - Click Create. Click Create. Create - Once created, double-check that this new apps project is selected in the project selector at the top of the console before proceeding to the next step. Once created, double-check that this new apps project is selected in the project selector at the top of the console before proceeding to the next step.

Step 2: Create the Service Account

Step 2: Create the Service Account - Go to the Google Cloud -> Service Accounts section. Or go via: Navigation menu -> IAM & Admin -> Service Accounts Go to the Google Cloud -> Service Accounts section. Or go via: Navigation menu -> IAM & Admin -> Service Accounts Google Cloud -> Service Accounts - Click Create Service Account Click Create Service Account Create Service Account - Name it: fastlane_[COMPANYNAME] Name it: fastlane_[COMPANYNAME] - Copy the service account email (it will

look like: fastlane_[COMPANYNAME]@apps.iam.gserviceaccount.com) Keep this to send to us later by email. Copy the service account email (it will look like: fastlane_[COMPANYNAME]@apps.iam.gserviceaccount.com) service account email Keep this to send to us later by email. Keep this to send to us later by email. - Click on Done. Click on Done. Done.

Step 3: Create & Download the JSON Key file

Step 3: Create & Download the JSON Key file - On the right of your new service account, click on the three dots -> Click on Manage Keys On the right of your new service account, click on the three dots three dots -> Click on Manage Keys Manage Keys - You ll be redirected to a new page. Click on Add Key -> Create New Key You ll be redirected to a new page. Click on Add Key -> Create New Key Add Key Create New Key - Choose JSON and click on create, which will download the file to your computer.. Choose JSON and click on create, which will download the file to your computer.. JSON - No need to open the file. Keep this file to send to us later by email. No need to open the file. Keep this file to send to us later by email. Keep this file to send to us later by email. If there s an issue with the JSON key If there s an issue with the JSON key Please refer to the video tutorial below

Step 4: Create the API Key

Step 4: Create the API Key - In Google Cloud, go to the Credentials section. Or via: Navigation menu -> APIs & Services -> Credentials In Google Cloud, go to the Credentials section. Or via: Navigation menu -> APIs & Services -> Credentials Credentials - Click Create Credentials -> API Key Click Create Credentials -> API Key Create Credentials API Key - A key will be generated -> click the copy icon. Keep this to send to us later by email. A key will be generated -> click the copy icon. Keep this to send to us later by email. Keep this to send to us later by email.

Step 5: Google API Enablement

Step 5: Note: Step 5 is not included in the video tutorial, but it is mandatory – don t forget to complete it! Note: not included in the video tutorial mandatory WARNING: Make sure you are in the correct Google Cloud project created in Step 1 correct Google Cloud project - Navigate to Google Cloud -> Enabled APIs & Services Navigate to Google Cloud -> Enabled APIs & Services Google Cloud -> Enabled APIs & Services - Click Enable for each API Click Enable for each API Enable Before: Before After: After:

Step 6: Final Check & Send

Step 6: Final Check & Send Include the following in your email to bs Include the following in your email to bsport: - Service account email (from Step 2) Service account email (from Step 2) email - JSON key file (from Step 3) JSON key file (from Step 3) JSON - API key (from Step 4) API key (from Step 4) API key - Google Cloud API Activation (from Step 5), completed (YES/NO)? (YES/NO) Google Cloud API Activation (from Step 5), completed (YES/NO)? (YES/NO) Google Cloud API Send everything to support@bsport.io (or your bsport contact) support@bsport.io

That s It!

That s It! You ve now set up your Service Account.
